United States Congressional Leaders Admit Possibility of Issue Arising

PRESIDENT OPPOSES LOWER RATES DRIVE

Chief Executive Said to Have Known Nothing of Move Until It Appeared in Press

Special from Monitor Bureau WASHINGTON, Oct. 20-The possibility that the tariff policy of the United States will be pushed to the fore as a political issue is admitted by congressional leaders as a result of the manifesto issued over the names of European financiers and American bankers, urging reduction of tariffs as obstacles to international

President Coolidge, through his official spokesman, hastened to express his disapproval of any drive to lower American tariff rates, although he would not go into the matter in detail until he had time to peruse the mani-festo. It was made quite plain at the White House that the President knew nothing of the move until he read the press dispatches, and that his comment was confined to his immediate reaction to what he understood to be its general import.

No Advance Knowledge drew Mellon, Secretary of the Treasury, discussed the European situation quite fully with the President trip last summer, no mention was

it must have been known in financial European circles at the time. As the situation was explained at the White House, the manifesto was entirely unexpected by both the President and Mr. Mellon and no preliminary draft, so far as was known at the White House, was shown to Mr. Mellon while he was in Europe.

It has been the desire of the Administration to steer clear of the general subject of tariff revision, on the ground that the flexible tariff has not yet had an adequate opportunity to demonstrate its usefulness, and that its effects must be observed over a period of years before an attempt is made to revise it.

trol plan.

The near future, the speaker said, will see building design change to demonstrate its usefulness, and that its effects must be observed over a period of years before an attempt is made to revise it.

Republicans Silent

The Democrats have several times endeavored to bring the tariff to the fore as a campaign issue, but the Republicans have been silent on the subject, except for general declarations that the present tariff rates are tions that the present tariff rates are tax; a study to standardize traffic a factor in national prosperity, until signals and signs, and a more complete co-operative interchange of forth by the report of the international bankers' declaration for gen-land states.

The White House dinner was a brilliant close of the Queen's day in the Capital. Sight-seeing, which ineral tariff revision here and abroad.

So complete and definite was the ration against tariff reduction that it ion of Congress that tariff had better be left alone. The President, it was made plain, believes that an examination of the situation will reveal the fact that only a minor part of the articles imported into the United States are subject to tariff. that the Republican tariff policy, as expressed in the present law, is based as much upon a belief that imorts are a just source of government revenue as upon the theory of protecting American industry, and (Continued on Page 2, Column 4)

Roller Bearings Ease New Sleeping Cars

By the Associated Press New York, Oct. 20

SLEEPING cars of the Chicago, Milwaukee & St. Paul Railway are to be equipped with roller bearings, officials have announced If passengers who use the \$2,000, 000 worth of rolling stock so equipped find their berths more comfortable as a result, coaches and freight cars may be similarly equipped later, it is said. St. Paul Railway officials specified the use of roller bearings on Pullman cars when it recently abandoned operating its own sleeping cars and signed a contract with the Pullman company.

#### Acton Finds \$25,000 in Town's Stocking

Came Like Treasure Trove and Helped Cut the Tax Rate Nearly \$14

Accumulations of small balances in various appropriation funds which had gone unused for several years until they amounted in the aggregate to more than \$25,000, constituted one of the factors which enabled the town of Acton. Mass. to reduce its tax rate by nearly \$14 this year, according to members of the board of assessors. The board announced yesterday that the rate will be \$26.40, as compared with the town's record high rate - last year

Another factor in the reduction of the rate was a revaluation which the town meeting last March voted to have made. This, together with the normal growth in values, added approximately \$500,000 to the town's tax rolls, making a total assessed valuation in round numbers of \$3, 500,000. Continued economical man-agement, together with an indicated increase in building operations in Acton this year will keep the rate low for 1927, the assessors believe.
They plan to do much of the town's needed road building while tax conditions are thus favorable.

## RAILWAYS SEEK CHANGING NEEDS

Homer Loring Tells State Industrial Conference of Program Under Way

QUICKER DELIVERY OF FREIGHT SOUGHT

Hand - to - Mouth Buying by Merchants Offers Problems to Transportation Lines

How the railroads are spending millions of dollars for improvements that they may serve New England Monitor. In the majority of cases advantage is taken of hardly 50 per cent of a street's usefulness. This circumstance results, he said, from nual meeting of the eleventh annual meeting of Massachusetts today, at the Copley-Plaza Hotel.

"Becent economic changes have

dependent on railroads," he said.
"We have entered a new era of 'prowith exceptionally prompt rail de-

with exceptionally prompt rail de-livery service."

To meet this situation, Mr. Loring continued, the Boston & Maine alone is spending \$5,000,000 for improve-ments this year, had established an industrial bureau to encourage and aid industries to locate in New England, and had opened business offices in 14 great cities of the country, and is experimenting with store-door deis experimenting with store-doo

Need of Diversification

One of the great needs of northern New England, declared Mr. Loring, is This can be accomplished with the extension and development of mechanical control, which with continued experience should in time of the road functions in seeking to bring new industries into the territory of the average freight-car history of the company.

Ever since cotton manufacturers projected the Boston & Lowell Rail-road in 1830 to augment the Middleroad in 1830 to augment the Middle-sex Central in winter, New England industries and railroads have been closely linked, declared Mr. Loring. Various improvements induded in the carrier's expenditure of \$5,-000,00 include unifying the Boston terminals and improving others, en-larging the Hoosac Tunnel, provid-ing new gasoline and gasoline-alec-

ciency as have those of any other section of the United States. Since 1921 the operating ratio of New England roads has been reduced from 91 to 76 per cent. From 1923 to 1925 the gross ton miles of freight moved per train hour, a reliable measure of operating efficiency have increased from 11,175 to 14,226."

Interests Called Mutual Mutual dependence of the railroads clared Alfred P. Thom, counsel for the American Railway Association at

"First, the ownership of the rail-roads has passed from the few to the

many. It can no longer be said that they are Wall Street owned. Stockpractically 2,000,000.
"Second is the establishment by voluntary action of shippers and their representatives throughout the country of Shippers' Regional Ad-visory Boards to co-operate with the car service division of the American

adequate transportation service Thus is marked an important de-parture from the old methods of dealing between the carriers and their patrons and is constituted one of the most notable and useful advances ever made in the field of Question of Consolidation Referring to the so-called "hand-

to-mouth" buying policy that now exists, Mr. Thom said it has resulted in a holding down of the amount of goods that merchants carry borrowed money, while as for con-solidation, he added, "unification of carriers into a reduced number of companies of well-balanced systems. is one of the great problems which now awaits solution." In touching on Government control

of carriers, Mr. Thom declared "the Government did not, in accordance to its pledge, return them in as good condition as they were in when it received them." He then gave a few examples of New England roads. examples of New England roads.

"For instance, the net railway operating income—the amount of earnings left after providing for operating expenses, taxes, hire of equipment, and joint facility rents—of Class 1 railways, excluding of Class 1 railways, excluding switching and terminal companies was for 1917, the year fust prior to Jovernment control, more than \$934,ederal control ceased, it was only

#### WEST DEMANDS 'A SQUARE DEAL' ON FARM RELIEF

Observer Hears Mr. Coolidge Charged With Being an "Eastern President"

By FREDERIC WILLIAM WILE CHICAGO, Oct. 20-Coming events are casting their shadows before in Illinois—two years before. They have to do with the presidential campaign of 1928. In the center of them looms the figure of Frank O. Lowden. During this season's survey of conditions in the Middle West, the name and the intensions of Governor Lowden have been encountered on all hands.

Throughout the rural regions stretching from the Great Lakes westward to the Rockies, Lowden is almost everywhere considered a Republican aspirant for President Coolidge's successorship. It is the custom in most parts of the country to believe that if Mr. Coolidge desires re-nomination, he can and will have it without opposition. That opinion, however, is decidedly not shared in the agricultural space There, on the contrary, the conviction prevails that whether the President is a candidate to succeed himself, or not, he will find the former Governor of Illinois athwart his path. There is but one contingency, apparently, that will take Lowden out of the race. That is, that the Coolidge administration between now and 1928 identifies itself with a program of farm relief immeasurably more satisfactory to the West than anything the White House has

Mr. Lowden is in a receptive mood under certain circumstances, but under no circumstances is he willing to make an aggressive com-

# Sterling Silver Gifts

For the October Bride

The nicest thing that you can do for that dear friend who is about to be married is to send her Silver from Loeser's. Her good taste is sure to approve the smart patterns, the sterling quality of our flatware and our larger pieces.

#### Sterling Sherbet Sets \$8.95

All brides need them—Sterling Silver Sherbet Sets, consisting of six engraved glass cups and six shining Silver Holders with fancy borders. Excellent value.

#### Bonbon Dishes \$3.95 and \$5

For the small remembrance a Bonbon Dish of sterling silver is adequate and correct. We show a variety of plain and hammered sterling silver designs, moderately priced. Bread and Butter Plates \$3.95

A touch of luxury is added to the bride's table by a gift of sterling silver Bread and Butter Plates, which have the buight finish.

Silver Salts and Peppers \$3.95 Pair Both plain and hammered sterling silver in several attractive shapes.

> Many Other Larger Pieces at Various Prices Loeser's-Main Floor

(3) Is success possible in an unchosen profession?

(5) What, according to President Coolidge, would be an ideal position?

-What They Are Saying

These Questions Were Answered in

Wholly a Sectional Feeling President Coolidge is bearing the brunt of the rural West discontent with things as they are at Washington, but the West's attitude is sec-

tional, rather than personal. In west-ern towns and cities, generally speaking, the President is widely and highly esteemed. But the West feels that the "East" is running things at the national capital and running them selfishly and systematically in eastern as against western or national interests.

The West is definitely persuaded face, and expound to them as a mem- at Washington, and habitually looks ber of their common industry, his upon the agricultural West as a stepfigure of Lowden's stature who took seven out of the 10 members of the the trouble to equip himself so thor- Coolidge Cabinet are western men -Hoover, Work, Kellogg, Davis (war), Wilbur, Jardine and Newoughly in the complicated realm of fails to convince the open spaces that

There is a good deal of complaint self with the West at first hand and looking its people straight in the eye. Since he became President, Mr. Coolidge has spoken in a number of westversified agricultural interests—Kan- ern cities like Omaha, Minneapolis, tion of American tariffs will be a sas, which raises a fifth of the Na- St. Paul and Chicago. He will visit magic key to European prosperity is French View Manifesto tion's wheat; Iowa, which harvests the lion's share of corn, and Wis-

ense sojourns. The President makes a speech and then boards his train back to Washington. Impression has taken root that Mr. Coolidge is not particularly interested in the West. Resentment on that score is real and widespread. Leading Republicans share it.

Some of them plan to move quietly but persistently, during the next few months to induce the President to explore the West. If he would pitch the 1927 summer White House so where between Chicago and Denver, it would work wonders.

Representative Dickinson, Republican of Iowa, a corn belt leader at Washington, is about to ask Congress to establish a permanent summer White House in the West. project is the graphic expression of the West's conviction, that Calvin Coolidge, is "a New England presirather than president of the United States.

New Western Movement Within a few months, Washington make last winter's corn belt crusade of Europe for a break in America's insignificant by comparison. It will tariff wall to allow larger sales of take the field on Capitol Hill, under the name of the "League of Inter-Mountain and Plain States." The league was formed in September, at Denver. Eventually the league hopes to have a group of 20 mid-western and western states marching shoul-

#### MCFADDEN BILL MAY AID COTTON

Banking Act Permits Larger Loans-Needs Final Approval of Congress

Special from Monitor Bureau

WASHINGTON, Oct. 29-The Mc-Fadden banking bill will be an important remedial measure in the present cotton situation, if its final passage can be obtained soon after Now Ready for Public Service. the opening of Congress, in the opin-ion of Andrew W. Mellon, Secretary

of the Treasury.

The President's cotton committee, consisting of Mr. Mellon, Eugene Meyer Jr., Herbert Hoover, Secretary of Commerce, and William M. Jardine, Secretary of Agriculture, held a meeting with all members present except Mr. Hoover, and discussed told The Christian Science Monitor problem of financing the record cotslump in prices.

ence. Mr. Mellon issued a statement calling attention to a provision of the speed of 1250 letters per minute each banks to make larger loans than are at present allowed on cotton, grain such loans to a single customer to

"It is not perhaps generally known," said Mr. Mellon, "that the McFadden banking bill, which has passed both houses of Congress and now pending in conference owing to differences of view on some questions, may be an important factor in the successful handling of the cotton

"For a number of years co-onerative cotton marketing organizations and many cotton planters have had difficulty in securing adequate accommodations from their local banks. It was largely in response to the recommendations made by them their banks to Congress that Section 10 was inserted in the banking bill, which would permit the national banks to make larger loans upon such readily marketable products as cotton, grain and the like.
Mr. Mellon expressed the hope

that "the differences between the two houses of Congress can be ironed out shortly after Congress recon-venes in December and banking legislation can be passed."

This is important to the farmer well as to the national banker," concluded. Suggestions that 4,000,000 bales of cotton be destroyed to bring prices back to higher levels are scouted by Mr. Mellon and other members of the committee as "un-sound economics."

by Mr. Meyer, Dr.W. B. Kilgore, chair- voted by the governors in Novemman of the American Cotton Growers' Exchange, and Oscar G. Johnton, a lawyer of Memphis, Tenn. Mr. Johnston reported on the results of the Memphis conference, which recommended withholding 4,000,000 day after 3 p. m., and on Sept. 21 the board voted further extension of bales of cotton from the market as a surplus to be marketed over an 18 months' period. He was told by Mr. Meyer that the President's committee has no authority to give official sanction to any such plan.

### Plymouth Hears for First Time the Boston Symphony Orchestra

Concert by Famous Musical Organization Marks End to Period in Which Old Town Had no Suitable Auditorium for Such Events

PLYMOUTH, Mass., Oct. 20 (Special)—In this quaint, historic town, where Pilgrims landed from England more than three centuries ago, the Boston Symphony Orchestra played yesterday for the first time in the 46 years of its history as one of the most remarkable musical organizations in the world

ganizations in the world.

The concert, which was given in the new Memorial Auditorium under the auspices of the Plymouth Teachers Club, was an event of far more than usual importance to the com-munity. It marked the end of long years when Plymouth had no suitable chamber to which such groups

could be invited to play.

Known as it has been the length and breadth of the land for its simplicity of architecture and the retention of that charm of the older fashion, Plymouth has hitherto been compelled to sacrifice, in the upholding of that claim, some of the properties of modern progress and cul-tural interest which, had provision been made for them, would have necessitated the tearing down of the older patterns.

No Andlence Chamber Until the completion last summe of the new auditorium, with its facilities for the pursuit of community interest in many fields, Plymouth had no audience chamber at all adequate for the giving of such a con-

Although no date has been announced for a second appearance of the orchestra here, it is assumed, from the notable success of this first concert, that Plymouth will henceforth share in what appears to be the of officers of the organization to increase the numer of appearances act as stimulus to gift elsewhere than in Boston, and not wherever they may be. necessarily to limit such appearances to metropolitan centers and large

The program was made up of four works. A Serenade of Mozart, the Roman Carnival Overture by Berlioz, Tchaikovsky's Fourth Symphony.

Although Plymouth has on occasion had distinguished visitors as representatives of the arts, it is the first time any organization of such size and standing in the musical world has appeared here.

The Plymouth Teachers' Club is an

active and ambitious group desirous of broadening the cultural advantages of the community. It took earnest thought in the campaign which made possible the acquisition of the Memorial Auditorium because its opportunity to observe most closely the reaching out of youth for the higher advantages of cultural education caused it to be especially impressed by the value such a center would have for the community.

The Boston Symphony Orchestra has had many friends in Plymouth since its first years, but they have been made friends by the concerts in Boston. And it was the desire of the Plymouth Teachers' Club that the Boston Symphony Orchestra should be one of the first musical organizations to be heard when the new building was completed to afford commensurate with its size

Hoped to Extend

For the musical organization itself, It is well known that Mr. Koussegram of visits to cities and towns

desire to acquaint music lovers on this side of the water with European writers of music whose names are practically unknown, yet who are doing, often under great handicap, superior and enduring work. He pointed out that he felt the composing of music in Europe to have entered upon a period of remarkable renaissance, that in Russia alone there are a number of admirable composers, many of them exceeding ly young, doing work which will take its place, when it is known, with the ranking works of many of the older masters. He agreed that the movement toward musical expression in Russia is tremendous and when it was inquired if the work thus coming forward reflected the great social and political changes that are so cumulatively apparent in Russia he said he felt that great art never had anything to do with social or political changes or influences.

Nor is the Boston Symphony Orchestra neglecting the work of American composers in its desire to place before its audiences the best to be found in music. Although there are fewer composers engaged in America in original writing than there are in Europe Mr. Koussevitzky has eagerly welcomed such scores as were to be brought out here and hopes, doubtless, that the increasing number of visits made by beginning of a tendency on the part the orchestra to cities and towns outside the metropolitan area will act as stimulus to gifted composers

NORTHEASTERN MEN TO ATTEND Dean Carl S. Ell and five members Roman Carnival Overture by Berlioz, "Till Eulenspiegel" by Strauss, and the Society for the Promotion of Engineering Education at Worcester Polytechnic Institute on SaturHopes to Carry Symphony Concerts Into Many Places

tory, which has been vacant for more than two years, offer the best

advantages in its proximity to transportation facilities, but the in-

#### OLD PIANO FACTORY ALTERED TO SERVE FURNITURE COMPANY ployment personnel, which now numbers 250, will be increased by at least 25 per cent with the open-ing of the Massachusetts Ayenue warehouse.

Massachusetts Avenue Plant With Six-Story Addition to Be Followed Next Year by 11-Story Structure-Location and Interior Meets Expansion Need

Avenue, the first step in the expansion of the Morgan Furniture Company of Boston will have been taken and early next year ground will be broken for an 11-story building to be erected at Kneeland and Washington Streets, where the offices and showooms of the company, now situated at 757 Washington Street, will be located, Abner Cohan, president of Morgan's, announced today.

The six-story addition to the Vose factory, designed by Isador 'Richmond, bears a similarity to the main

With the completion this year of the sidings which extend along two the six-story addition to the old Vose piano factory on Massachusetts Avenue, the first step in the expanloading platforms over which roofs tion has been found necessary have been built. have been built.

The bulk of the outside wall space consists of glass. The addition inextra truck bodies eliminates the of Chicago, it was announced today necessity for trucks to wait while from the office of C. E. Carter, resithe loads are removed.

With the Vose factory develop- ban property.

What is believed to be one of the cludes installation of devices which largest real estate transactions ever will handle the demountable bodies to occur in Boston took place with of the automobile trucks. The loads of furniture can be removed from the trucks and transferred to highspeed elevators and a supply of Park Manor, Inc., to Harry J. Stroop

dent manager of the exclusive suburrt is well known that Mr. Rousse-vitzky has hoped to extend the pro-building in architectural design. The ment, in addition to the proposed Kram of visits to cities and towns 80,000 square feet of area in the 11-story building, plans for which Park establishment, completed two gram of visits to cities and towns outside of Boston and to add, each year as it was possible, towns which have hitherto either done without the hitherto either done without by freight cars may be unloaded from the contents of the content are contained stores, garages and en-

tertainment halls. The building, which commands an excellent view of the surrounding districts from its position atop the hill at the corner of Colchester and Chapel streets, is constructed in three sections to afford an unobstructed outlook to every room.

To enter the building from an automobile, passageways extend under ground to a garage in the basement

where passengers alighting from their cars are lifted to their floor in elevators. The change in ownership will not affect the present manage ment, it is said. The estate of David H. Greenough has sold to Victor Kaufman the 31/2

story building and 523 feet of land at 159 Washington Street, near the corner of Cornhill. The total assessed valuation of the property is \$77,000 of which \$73,200 is on the land. Rosenfield & Levin have a long term lease on the property. The sale was made through Cape, Inc.

Strong assurance that 1926 will see all previous records for construction activities eclipsed has presented itself. Not only is the volume of building operations for the first nine months 3 per cent greater than corresponding period of 1925, the high year to date, but a vast amount of contracts have recently been contracts and contracts have recently been contracts and contracts and contracts are contracted at its weekly Sunday afternoon so-sion has approved the appointment by Mayor Nichols of W. Franklin Burnham as a member of the Roard contracts and contracts are contracted as a contract contract contracts and contract contracts are contracted as a contract contract contracts and contract contracts are contracted as a contract contract contract contracts and contract contract contracts are contracted as a contract contract contract contracts and contract cont of contracts have recently been Peace," at 4:30 p. m.

from its present radius of approxi- awarded and will soon be carried out mately 100 miles to a much greater to make the total for this year reach distance, said Mr. Cohan. The eman astounding figure, according to statistics compiled by the Associated General Contractors of America.

The volume of building contracts awarded during August was the greatest registered in any month on record exceeding the previous high mark, set in August, 1925, by more than 2 per cent. The total volume of contracts awarded during the first eight months of 1926 exceeded by 10 per cent the corresponding figures

Expansion Reported by American Traveler

New England has a great oppor-tunity to expand its trade with South America, according to Frank-lin Johnston, publisher of the American Exporter, who has just returned from a tour of South America, and

larger share of the total South American trade than before the war and the sentiment of the many mer-chants I met, made it clear that our share is likely to increase," said Mr. Johnston. "The South American markets are realizing more and more the advantages of good products, rather than cheap prices. Some European orders taken at low prices, have not worked out successfully," said Mr. Johnston

That the United States has almost a complete monopoly in certain lines of trade with South America, was asserted by Mr. Johnston, who called attention particularly to automobiles. "No less than 98 per cent of all the automobiles sold in Argentina today are American. Traffic congestion is becoming acute in Buenos Aires and to a lesser extent in Rio de Janeiro,'

New England sardines have a big market in South America, continued Mr. Johnson, also, medium priced jewelry, leather and shoe findings, rubber shoes, candy, canned goods and many other lines which are made in the United States.

## MINUTE MAN TAVERN

Nearly Two Centuries Ago

LYNN, Mass., Oct. 20 (Special)-Work of razing Minute Man Tavern, relic of pre-revolutionary days on Federal Street, is practically completed and soon a modern business chines in the experiment consider building will be standing on its site. Minute Man Tavern, according to ice that they have decided to keep records, was built in 1734. The old the equipment. iron latch on the front door bore the date of its erection. The tavern derives its name from the fact that the Lynn contingent of Minute Men, a branch of that sturdy body of vigilants that marched to meet the advancing British troops on Lexington

tavern as their meeting place.

## SOUTH AMERICAN Electricity Lightening Labor TRADE GROWING for Farmers of New Hampshire

Opportunity for Further Preliminary Reports in Survey Under Auspices of State and Federal Officials Indicate It May Soon Revolutionize the Lot of Farm Folks

DURHAM, N. H., Oct. 20 (P)— lighting, electricity may prove of Reaching out even into remote parts of the State, electricity may soon revolutionize the lot of New Hampshire farm women and lighten the labors of the men. This is indicated by preliminary reports from the small

have been encouraging, W. T. Ackerman, leader of the project, reports. Women are particularly enthusiastic over these modern devices for lessening their drudgery, including electric ranges with which they have been experimenting.

The electric ovens have been found to save time and give a constant temperature without attention and to be more convenient, cleaner and oler during hot weather. On one of the farms rates for electricity were such that it was found impractical to use any range-heating device.

Washing Machines

Electric washing machines were found to be far more of a boon to the rural housewife 'han to the city woman. One of the housewives cowoman. One of the housewives co-operating in the study averages seven tubs of laundry every Monday morning, but with the washing ma-chine available she and the other farm women no longer dread the weekly washing and froning. The cost of operating the machines has proven ridiculously small.

On two of the farms electric dish washers are in use. In one case the housewife uses this machine three IN LYNN DEMOLISHED times a day and says she wouldn't be without it. On the other farm, where another type of washer is being tried out, results have not been entirely satisfactory from the family's point of view.

Electrical refrigeration promises to be one of the most successful activities of the project. Despite the common belief that ice is plentiful and cheap to the farmer, families using household refrigerating ma-

Two types of hot water heaters are being experimented with, and families using them have been pleased with their efficient operation, although the question of cost remains to be determined. Water pumping by electricity is considered already past the experimental stage, and most farmers are eager to adopt Green in April, 1775, used this old Few alterations were made in the this method as soon as current is tavern. A flat porch on the rear was available. On one farm installation of an electric water system saved 40 minutes' labor a day in pumping

#### MAYOR FIRM FOR SUBWAY

Will Continue to Urge Governor Square Project Despite Trustees' Viewpoint

Mayor Nichols told members of the Civitan Club and the Governor Square Associates at a luncheon yesterday at the Hotel Buckminster that he is going to urge upon the Boston Elevated Railway Company its cooperation in building the \$5,000,000 Governor Square sub-surface station and the extension of the Boylston Street tunnel to points in Beacon Street and Commonwealth Avenue as a vital step in solving Boston's traffic

The Mayor said that while a comprehensive solution of Boston's traffic congestion will cost about 300,000,000, the cost of the Governor Square improvement is so small compared with the benefits which would result that it should be started at

The Mayor said that he appreciated the position of the Elevated trustees, but he insisted that operation of the swifter trains in the subway and a large increase in patronage which would follow would reduce the additional rental of \$250,000 yearly to about \$50,000.

Of Vital Necessity

"The needs of the public are such," "The needs of the public are such," said the Mayor, "that we cannot allow the comparatively small sum of \$5,000,000 which the Governor Square improvement would cost to hold up this project. The traffic problem at Governor Square is so great and the pressure such that the project should be taken up at once. Let the broader traffic problems covering the rest of the city wait for the moment. Theirs is a complex situation; here it is comparatively simple.

paratively simple.
"This intersection is the key center

"Three hundred millions does not Besides its value for artificial ment costs. New York City's estimate is \$1,000,000,000. The private individual, engrossed in his business, does not realize the tremendous

> "In May, 1925," said the Mayor, "the Legislature passed an act allowing for the extension of the Boylston Street subway, presumably by means of a tunnel under Goversystem slows up traffic all along the

Boylston Street line." Colonel Sullivan's View Col. Thomas F. Sullivan snoke for

he Transit Department and its plans respecting this first step in traffic improvement saying: "We face today exactly the same situation which held a few years ago in East Boston, At that time trolley cars were run in that subway, coming to the surface at Maverick Square. The traffic on the whole East Boston line was held up by the congestion at that point. Later, trains were put in and now there is no congestion at all on this He explained to the 80 men present,

that by means of the underground station pedestrians could avoid the delay of surface crossing from one of the five streets converging here to another. He said that a section of the tunnel would be continued out on Street perhaps to Audubon Circle while the main line would go out under Commonwealth Avenue for some distance not yet decided.

What Plans Call For Colonel Sullivan said that the plans

for the improvements at Governor Square called for an underground station at this spot. A section of the subway would be continued up Beacon Street to Audubon Circle which would be the permanent ending of the subway on this line. As ing of the subway on this line. As to the Commonwealth subway, which would be the main line taken by the subway trains, the Colonel said it was not yet decided just where the

was not yet decided just where the terminus would be.

"Three years would be required to complete the work," he went on. "It would necessarily have to go slowly since a complete tieup of Governor Square for automobile trame would not be permitted.

#### Reginald Boardman

radical departure from custom, and therefore retreshing. He began with therefore recreshing. He began with a group of moderns, went on to two movements from Beethoven's Sonata op. 106, and closed with Chopin and Liszt. Several of the modern compositions were labeled "first time" by the program. This presumably meant they were being played for the first time in Boston. The audience was unusually large for a début recital. Goosseus "The Tug," from "Ships," was the description of the first item, So far as presenting any picture, or even, in expressionistic lings, conveying the essence of tugboat-ism, was

ing the essence of tugboat-ism, was concerned, it might as well have been entitled "Exhaust," from "Mo-

Not so with Castelnuovo-Tedesco's Not so with Castelmovo-Tedesco's Cipressi," which followed. Here a definite mood is established at once, the picture is vividly presented. But the film is a bit long, and before it is over these cypresses seem to have been dug up and replaced by Respighi's pines. A waitz of Bartók's left no marked impression, but the Sketch op. 3 No. 4 by the same composer raised visions of Hungarian

Debussy's "Feu d'artifice" and Noc-turne, "La Danse d'Olaf," by Pick-Mangiagalli closed the group. By this tame Mr. Boardman had made it clear that he is a pianist of no ordinary talent. He had displayed none of the uncertainty that often marks first recitals. His technical equipment is complete, his tone pleasing, his shading intelligent. His playing of "La Danse d'Olaf" was a delight. His qualities were of service to him in the Beethoven, but here something more was needed. The chief defect of execution was lack of a good legato. It was also apparent that the player had not yet plumbed the depths of this music, much less prepared himself to reveal something new in it. But one cannot expect everything at But one cannot expect everything at once from a young artist, Mr. Boardman's present accomplishment is such that one may well hold high

"Cavalleria" and "Pagliacci"

hopes of his development.

Opera Company presented the inseparables of operadom, Mascagni's "Cavalleria Rusticana" - and Leoncavallo's "I Pagliacci," at the Boston These, together with Horace B. Gale, Natick, and Arthur C. Comey, ton Opera House. As is customary, Mascagni's work, the briefer of the two, was sung first. The cast:

Santusya 

Miss Jacobo brought to her part much dramatic intensity. She im-bued the work with a warmer feel-ing than one had anticipated. Her voice last night was richly resonant and soared to fine climaxes. It reflected emotional color. It shone with lustrous tones. The actress herself was in a responsive mood. She molded her interpretation of the beset Santuzza to the veriest detail of stagecraft. But she also drew her character with the broad stroke which carries well across the footlights. Miss Jacobo usually makes economical use of gesture and pos-turing. Every move is made to count in the sum of character

count in the sum of character evolved, seeming to derive from inner urge or feeling. Through it all Miss Jacobo left the impression of brilliance.

Franco Tafuro made a pleasant Bort of villain, for he peither looked nor sounded so base as the libretto ested in agricultural problems. In the last session of Parliament, she introduced a resolution to pay con-Franco Tafuro made a pleasant sort of villain, for he peither looked nor sounded so base as the libretto records him. His acting was best in the scenes with Miss Jacobo, wherein each maintained a high denor sounded so base as the libretto records him. His acting was best in the scenes with Miss Jacobo, wherein each maintained a high degree of musicianship. Alfo, as played by Mr. Interrante, was a straightforward and unaffected role to be traversed conscientiously but without any nusual show of abilities. As or Miss Schalker's Lole, of which much might have been expacted, it proved inferior to many of the impersonations this young of the impersonations this young woman has encompassed within the last 18 days.

Turning from the vivid, dramatic and tense atmosphere maintained in the scenes with Miss Jacobo, where the scenes with Miss Jacobo, where the scenes with Miss Jacobo, where the list of provided a resolution to pay convicts which gave rise to an intercent of the constitution as the Great and General Bridge to the Neponset at Harvard Bridge

"Cavalleria" to that of "Tegliaco" was a decided change and not albe gether satisfactory. The cast:

Eastern States Agricultural and Industrial League to Dissolve

to Dissolve

Attractive though Miss Saroya was in appearance, her acting did not bring to a high pinch of endeavor this play, as did the work of Miss Jacobo in the preceding piece. Rather it went on its even SPRINGFUELD. Mass., Oct. 26 (Special)—Dissolution of the Eastern States Agricultural and Industrial League in this city, decided upon at a meeting of the league in the Colony Club yesterday afterneon, will result in the formation of two important movements, junior achievement and home information bureaus, on an independent basis designed ultimately to become mation-wide.

It was veted to incorporate separately, and in each case on a nation-wide basis, the bureaus of the league which have been carrying on Junior Achievement Club work and the home information center work. Committees were appointed to take the necessary and not always interesting way.
Mr. Conatt's Tonio held some fine
work, from the combined standpoint of acting and singing. Mr. de
Gaviria's Canio was a clear-voiced. greater ease and assurance, leaving a favorable impression. In this piece, as in the "Rusticana," the chorus responded with an unwonted and buoyant gusto. C. S. S.

Massachusetts Managers Center Attention on Efforts to Get Out the Vote

While spurring on the campaign all over Massachusetts the Republi-can State Committee announced to-that the Greater Boston voters day that the Greater Boston voters are not being neglected and noon-day meetings are to be held in Court Street, Boston, at the Blackstone National Bank Building every week day until election day. At the same time the committee began its final round-up of county, city and town committees throughout the State to see to it that a large your is brought. see to it that a large vote is brought out on Nov. 2. It is admitted that today getting out the vote is the first concern now of the field managers

of the campaign.
From the Democratic State Committee's campaign headquarters at the American House workers are being sent out all over the State to get in personal touch with the local committees intrusted with getting out the vote. The efforts the Republicans are making are being paralleled in a measure by the Democrats for the managers in both parties realize the necessity of making this an unusual effort as judged by the écords in other so-called "off years."

Democrats Seek City Vote

Especial attention is being paid by Democratic organizations to getting out the votes in the cities, and there they are massing their efforts. The Democratic State Committee announced that a great mass meeting is to be held in Springfield on Saturday night, at which all of the leading candidates on the state ticket will appeal to the voters in that normally Republican city.

The Republican candidates con-

tinue today their tour through the western part of the State. Meetings are to be held this afternoon and tonight at Greenfield and Pittsfield. Senator Butler, Governor Fuller and J. Hampton Moore, formerly Repre-sentative in Congress and once Mayor of Philadelphia, will be today's speakers in the western Massachusetts drive.

Former Senator Walsh, William A. Gaston, Democratic candidate for candidate for Lieutenant-Governor, are to address large rallies in Memorial Hall, Lowell, and the Winter Garden in Lawrence tonight. The Democrats are planning also for an energetic speaking campaign in

Senator Butler at Leominster Senator Butler, addressing rallies at Leominster and Fitchburg, last night, renewed his appeal to the people to support the Administration of President Coolidge by voting for the Republican candidates in Massachusetts. He alluded to the fact that Fitchburg is the city where former Senator Walsh votes, but he urged that Mr. Walsh could give no real support to President Coolidge without reading himself out of the

Democratic Party.

Governor Fuller dropped the formal address and reviewed off-hand the state administration's record for efficiency and economy since he took the chair once occupied by Calvin Coolidge and Charning H.

Mr. Walsh and Mr. Gaston spoke to large rallies in Newburyport, Ips-Gaston discussed the wet bill he sponsors in his speech. Mr. Walsh asked Senator Butler to discuss the campaign funds in the senatorial

primary campaigns in Pennsylvania and Illinois.

John F. Fitzgerald, formerly Mayor of Boston, will advocate tonight over the radio the election of Mr. Walsh and Mr. Gaston and the

entire Democratic ticket.

Call for Enactment by Congress of Measure Lost in Last Session

DES MOINES, Ia., Oct. 20 (Special)-The 30 farm groups now merged into "The Grain Belt Federation of Farm Organizations," an outgrowth of last spring's corn belt committee, are backing plans for a determined effort to push the Mc-Nary-Haugen farm relief bill through the coming short session of Congress.

This was made known at a meeting of the federation at which it also was given out that it and the Com-mittee of Twenty-Two, represented unofficially at the conference, will present a solid front in Washington for passage of an act that will place agriculture on an equal footing with other protected industries, the slogan being "protection for all or protection for none.'

Plan Amply Financed

The McNary-Haugen bill, rejected at the last session of Congress, would take care of the export surplus of staple farm products. The campaign for the legislation will be amply financed, it was indicated in the decision to tax the combined membership of the federation, ap-proximately 1,000,000 members, 5 cents each to provide a fund of \$50,000.

An appeal is to be made to the South to join the West in support of its export program. The depressed cotton market was urged as an incentive for unified action in obtaining relief.

An immediate request will go to

every agricultural college in the 13 states represented asking that the cost of production plus a 5 per cent profit be computed upon all staple farm crops produced in each state in the organization, that a basis of market levels may be obtained.

Since the organization was per fected last May, the membership has been increased by the addition of the Minnesota Wheat Growers' Association, the Minnesota Council of Agriculture, the Wisconsin Co-operative Creamery Association, and the Farmers' Union Livestock Commission of

Special from Monitor Bureau dealers, said to represent over 2000 farmers' co-operative grain elevators in 11 middle western states, in an creases in price to the producer as interview with President Coolidge, transportation costs rise. This was informed him that they were op-posed to the McNary-Haugen farm relief method or any other equalization fee plan, disapproved all projects for the reclamation of new farm lands on which grain might be grown, and wanted the St. Lawrence-

to-the-Ocean waterway opened. The delegation consisted of repre-sentatives from the state divisions of the Farmers' National Grain Dealers' Association, which is holding its annual convention in the capital. J. W. Shorthill, secretary and spokesman for the gathering, stated that the association had branches in 11 "surplus grain states from Oklahoma to North Dakota and as far east as Ohio." The state organizations were built on co-operative grain elevator associamembership of 100 or more local farmers.

Politics in Equalization Fee Demand Politics, according to Mr. Short-hill, was responsible for the demand for the equalization fee, which he characterized as an "equalization fee tax." Mr. Shorthill said that the group he represented was opposed to any legislation that made compulsory co-operative marketing.

Invited to address the gathering

on the problems of marketing confronting the grain growers, Herbert Hoover, Secretary of Commerce, discussed the question of waterway transportation. He told the grain dealers that upon the opening to ocean commerce of the Great Lakes route and the Mississippi waterways system devolved the future growth both in agriculture and industry of the Middle West. The cost of developing the Mississippi system he estimated at \$150,000,000 and the American share of the St. Lawrence route at \$200,000,000, deducting the

one man for accomplishments." Keeps Politics Out To keep all political interest out of the commission's work is a first essential. Mr. Wacker reported. The Chicago Plan Commission members have always served without salary. Mr. Burnham gave not only his time but also money. "A wonderful bit of public-spirited work," added Mr.

The fact that the Chicago commission has no executive power, but is merely advisory, is another source of strength, Mr. Wacker declared. Depending on the backing of public opinion for each step of its way, it is all the more firmly grounded. "It puts the responsibility on the peonle," he held.

Chicago's achievements in city planning have been an advertising second to none, the chairman of the commission asserted. "Our commission is in correspond-ence with the world." he said, explaining that requests for advice in laying out municipalities come from points as distant as China and Ja-pan. An Australian, chief engineer of Melbourne, made a personal call upon the commission.

"I've heard enough about what people are going to do," he said. "Tell me what you have done." He was told and returned to Australia. "And we've been corresponding with him ever since," Mr. Wacker added. City Planning No Fad

## MILLS CAMPAIGN WARNS AGAINST

Republican Candidate for Governor Sees Attempt to Get State Control

By a Staff Correspondent BATAVIA, N. Y., Oct. 20-Ogden L. Mills, Republican candidate for Governor, added Kings County to the Bronx and Queens County in his charges that skimmed and adulterated milk is still being sold in New York City 18 months after the original investigation into such prac-tices was begun.

Speaking here before a large audience, Mr. Mills charged that milk inspection in New York City is "in-adequate and lax." He laid responsibility for the situation at the doors of Governor Alfred E. Smith, asserting that the latter had declared the matter is a "local problem."

In the past two weeks of cam-paigning Mr. Mills has changed from a debater into a campaign orator of first rank, and today he voiced his charges against Tammany with a vigor that brought applause from

Tests in Kings County

"How inadequate and lax the inspection is," said Mr. Mills, "18 months after this situation was first disclosed, is indicated by the analysis of the samples of milk recently purchased in New York City which have come to me from a reputable

"I have already told of the information received by me in respect of Bronx and Queens Counties. Here are some new figures covering analyses of samples purchased in Kings

'Seventy-two samples were purchased in 72 widely distributed districts. Of these, eight were good and 64 failed to come up to the standards required by the sanitary code. Seventy-eight violations of the sanitary code were charged by the laboratories against the 64 deficient milk samples. This shows that 92 per cent of the samples taken in Kings County were below the standards prescribed by law. Let me repeat:

Calls for Investigation

"In the light of this new information, may I again ask Governor Smith whether he is not willing to request the commissioner of farms and markets to send back his state inspectors and whether he is not willing to initiate a state investigabacked by the full authority of

the state government.
"Now there is another side to it.
In 1925 we didn't just buy samples
in New York City. We wanted to
find out where the trouble was. We sent two men upstate. We went to the collecting points maintained by the big companies. We examined the companies' own books, we exam-ined the records of the milk coming from 1343 farms, and what do you suppose we found?

comes from the farms is pure, whole ing engagements and present his evimilk, well above the standard required by law. What happens to that Tuesday as Mr. Newcombe had

"How does the milk which is above standard when it comes from the farm become below standard when it reaches the breakfast table in New

York City
"I know of only three ways: "One is to pour in skim milk. The other is to skim the milk itself, And the third is to add water. Any one of the three constitutes a violation of

"If a quart of cream is skimmed from every 40-quart can of milk, it means that some one is making an illegitimate profit of \$1.10. And it is Orchestra, Ethel Leginska, conducorchestra, El orchestra, El or

MOTH PROTECTION

\$34,000,000 to \$35,000,000 that some one is making—and it is not the

farmer:
"Every quart of water poured into a can of milk means one quart less of milk sold and one quart more of TAMMANY RULE milk added to the surplus supply that constitutes the crux of the milk problem in the state of New York and harms the farmer's business.

Denies It Is a Local Problem

"The Governor said it is a local problem. A matter affecting 6,000,000 people cannot be a local problem. But waiting that phase, it is still more than a local problem. Not only is the welfare of the consumer involved, but vital interests of the producer.

Someone is tampering with the pure article the farmer is putting on the market. He is entitled to know who. He is entitled to the protection of the state government. He is not getting it. Nothing short of a complete investigation by the State will give him that protection. He has got to get that investigation from Governor Smith by Nov. 2, or Governor Smith has got to go and we will get it from Governor Mills on

In an address frequently interrupted by friendly greetings from a crowd of 4000, Mr. Mills in his speech at Buffalo, attacked the policy of Government ownership and operation of public utilities. This policy, Mr. Mills said, would play into the hands of the Tammany political machine and enable it to maintain its servants on the public payroll and to increase its potronage.

Function Is Service

"I cling to the old-fashioned noion," he said, "that a public utility s primarily to furnish service, not votes, and it is yet to be demonstrated that our politicians can be persuaded to adopt that view." Mr. Mills alleged that Tammany

Hall ardently desires the operation of public utilities. He said, in part: "When an organization of character of Tammany seeks to extend the powers of government so as to include business organizations employing thousands of men, when it does so at the very minute it is seek-ing to add control of the state government to its complete mastery great city, the conclusion is inevitable that the real purpose is a vast increase of the power of the organization itself."

Mr. Mills said that every man put on the public pay roll by patronage means the vote of that man and of his family and close friends for the

Pictures Political Army

"Here are the noncommissioned officers around which to build the company, the company to the reginent, the regiment to an army, a well-controlled army obedient to the commands of the chief. "Fanciful? Not at all. It is a faith-

ful picture of the political machine that governs the city of New York and that plans to absorb the State." Mr. Mills earlier in the day addressed a reply to Richard S. Newcombe, district attorney of Queens County, offering to present the evidence on which he had made his milk graft charges, when he returns to ined the records of the milk coming from 1843 farms, and what do you suppose we found?

"We found that the milk that would be impossible to break speak-

milk as it travels from the farms to the best breakfest table, as it passes from the farm to the baby's bottle? That is what we want to know.

"I shall be in New York at the end of the week," he said, and shall be very glad indeed to present to the Grand Jury such information as I

myself and then to study both sides of the question. What I learned completely changed my view.

False Conclusions Drawn "The way the medical profession on the false information of vivisec tion and anti-toxin merchants, has blamed animals for human diseases is, I may say, vindictive in the extreme. For years dogs were sup-posed to be the cause of disease, but when the dog craze increased and dog shows became more numerous we switched to cats. I believed that cats caused diphtheria until I found out that if you inject one with every germ in the world you could not make him develop the disease.

"Horses were also supposed to mice, lice, bags, fleas, monkeys, don keys, turkeys, mosquitoes and ele-phants. In fact, the only animal or insect that has not made a tour as having been the cause of disease is the American eagle, and that is because the vivisectionists cannot get hold of him for experimental pur-Colonel Donegan declared that it

was a "waste of energy and a gross injustice for a vivisectionist to experiment on a dog for the purpose working out problems cont with human disease, as it would only lead to false conclusions that would be absolutely dangerous to humans."
"Vivisection and anti-toxin," he

continued, "are looked on as one and the same thing. For if one industry collapsed, so would the other, and the sooner the better. Many may not believe me when I say that anti-toxins are perfectly useless."

#### CREDIT BUYING EXCESS LIKENED TO SLAVERY

Special from Monitor Bureau NEW YORK-Installment buying by wage earners, beyond the acquiring of a modest home modestly furnished, was condemned by George

F. Johnson, president of the Endi-cott Johnson Company, shoe manufacturers, employing 17,000 persons, in an interview here. He characterized the practice as a form of 'slavery," which hampers independ ent action and raises living costs and "makes for unhappiness and discouragement. "Teaching the poor person that he

may get luxuries before he has se-cured the necessities of life, before he has given his family those things essential for their health and happiness, should be condemned in the strongest possible way."

Noon Gun-An ancient cannon in the Palais Royal, Paris, is a scientifically constructed astronomical instrument. It is fitted with converging lenses that collect the sun's rays until they are powerful enough to detonate a small charge of powder

ss Has Always Been a Good Ca

#### TUNING OF B-D IS QUESTION OF PRACTICE

#### Once Knack Is Acquired **Good Distance Reception** Is Possible

This is the second of two articles by Mr. Browning on the B-D Impedance Fire receiver. The first article dealt with the parts used in the construction of this receiver, schile this article is devoted to tuning instructions and answers to some of the questions commonly asked about this set.

#### By GLENN H. BROWNING

A little experience in tuning, on the part of the operator, is better than a whole book on the subject, though a few suggestions may be useful. After the receiver has been balanced, according to the direction given, it is ready to overate.

With antenna, ground, batteries, etc., connected, set the rotor coil on the B-D transformer, in such a position that the secondary circuit is oscillating. Turn the second dialthe one to the right—until a whistle is heard; this whistle is the carrier wave of the transmitting station beating with the oscillations the set is producing, and will be heard if a station within range of the receiver

is transmitting. Turn back the rotor coil so that the whistle disappears and at the same time turn the left hand dial (the first condenser) until the signals are loudest. Readjust the two tuning condensers and the rotor coil until satisfactory volume is obtained. It will be found that rheostat No. 1 makes an excellent volume control for tan ing it down, regulating the signals received, without detuning the set This reostat is also useful in separating staions which are very close together, and interfering with each other, for by turning this rheostat down slightly, greater selectivity can

usually be obtained. Many people have asked the question: "If radio frequency is the de-termining factor in distant reception, why not add a number of stages of amplification, and be able to receive stations 3000 or 4000 miles away, at will?"

#### Distance Limit

The answer is that there is a definite limit to the distance which any radio set can receive, no matter sensitive the receiver may be This is due to the fact that there is and other interference present in the atmosphere, and when this noise is louder at the receiver than the signal sent out by some distant station, no set would be able to pick up the sta-tion. This noise level has been defined many times as the impassable barrier beyond which no radio reception is possible. Thus the reader will see that there is little use in having a set more sensitive than conditions warrant. This is the main reason why two stages of efficient radio-frequency amplification, with regeneration, are not used, as one stage properly designed and constructed, together with regeneration sensitive to receive signals above the noise

#### Questions Commonly Asked 1. What would tend to make the

set tune broadly?

Too large a condenser in series with the antenna, that is, one whose capacity is larger than .0001, would use a mica or air condenser whose capacity has been measured and found to be between .00008 and .0001. Poorly soldered joints, especially to the coils, may also account for the coils, may also account for condenser of tuning. Poorly soldered joints, especially to the coils, may also account for broadness of tuning.

In regions where there are a large number of local radiocasting stations.

6. What would give a constant hum in the receiver?

The range of any receiver, of

number of local radiocasting stations, complete shielding of the receiver may also help selectivity. Care should be taken when shielding to keep the two inches away from the coils. The shield should always be grounded.

#### Registered at the Christian Science Publishing House

#### Two B-D Diagrams Given

Both Schematic and Pictorial Diagrams Are Given Above So That the Readers May Take Their Choice. It Will Be Seen From These Diagrams That the Wiring is Not intricate. If Care is Used in Soldering the Joints, a High Quality Receiver is a Relatively Easy Achievement, The Panel Drilling Template is Also Shown.

with the receiver? Ordinarily a 40 to 70-foot antenna with as much vertical part as possible operates most efficiently, the vertical component being the factor which picks up a large percentage of the signal. A short indoor antenna A loop may be employed, but it will be found that the receiver will

directly as possible to the receiver is nected to these points. best. Steam pipes sometimes make good grounds but cannot be relied use a 199 tube in the first socket?

4. What would tend to make the receiver go into oscillation with a and consequently is easier to bal-"snap" or "plop," when the tickler ance. There are other tubes of

oscillation smoothly as it should?

The gridleak may not be properly adjusted or the "B" battery voltage on the detector may be too high. The give this effect, or a .0001 which had an excessive amount of loss in it.

What size antenna works best the receiver?

ably be due to an omitted grid return or open circuit. This might be turn or open circuit. This might be quality of tubes used, location, and as much vertical part as postory to the tubes, the condition usually existing when the "C" battern to the operator. tery is disconnected.

6. Can a loop be satisfactorily of the signal. A short indoor antenna of perhaps 10 feet in length can be used with considerable success, and antenna, even 15 or 20 feet, gives more signal strength, and therefore be more selective as the antenna is it is advisable to use such an antenna rather than a loop. However, 2. What kind of a ground is best? if a loop is employed, the antenna Ordinarily a ground clamp around coil should be disconnected at

The 199 type tube has a very small internal grid-to-plate capacity coil is rotated instead of going into smaller capacity, such as the Magnavox, which may also be used very

successfully as radio-frequency am pliflers. If a 201A-type tube is used in the first socket, the 25 to 33-ohm fixed resistance should be omitted. Dry cell tubes may be used throughout and the range of the receiver will be as great, although the loud-

If there are no power lines close to the antenna, the hum would prob-

eit tells the truth

There is nothing like a good reliable pocket meter to trace radio troubles and to know true "B" battery conditions.

For example, the Sterling 0-50 volt Pocket Meter has exactly the right resistance to give accurate readings without wasting battery strength during the test.

For every battery requirement, A or B, dry or wet, there is a specific type of Sterling Meter, Ammeters, Voltmeters and Volt-Ammeters.

Price, \$1.00 to \$4.00

The Sterling Mfg. Co.

Iterling

Sterling Pocket Meters have been known 1906. Surely your dealer sells them.

Write for 32-page, instructive, ooklet on care and upkeep of radio.

Under average winter conditions transcontinental reception has been

accomplished with a fair degree of regularity with these receivers, and it is believed that when properly constructed, the set will "go down to the static level."

Radio-frequency amplification is the governing factor in distancegetting ability of a receiver, and the fact that a radio-frequency transcold water pipe with a wire run as points A-B and a loop antenna con- former has been developed that delivers maximum voltage amplifica-

## The Baltic Cities of Finland-Europe's Great Timber Exporter

Republic's Campaign Revealing Opportunities Has Brought Much Tonnage Into the Harbors

Four nations along the coast of the Baltic Sea returned to independency after the World War. Their united or separate activities in the attainment of economic stability is likely to stir political thought many times within the next few years. They are European. They are young republics. Hence their importance. To this group of Finland, Estonia, Latvia, and Lithuania should be added East Prussia and Danzig. The following is the seventh of a series of articles prepared at the request of THE CHRISTIAN SCHENCE. of a series of articles prepared at the request of The Christian Science Monitor by Prof. Eugene E. Van Cleef of Ohio State University. The purpose is to describe the character of the ports today, their equipment for business, and their outlook for trade. After the ports of Finland, Konigsberg will be discussed.

By EUGENE E. VAN CLEEF

VII HE ports of Finland, evenly spaced along the country's island-bordered coast, are lo-cated for the most part at the mouths of streams many of which are navigable for small craft far joys an advantageous commercial pojoys an advantageous commercial po-sition. Its spacious harbor protected into the interior. Exclusive of Marichamm in the Aland Islands, 20 from storm waves by the island-first-class ports may be counted fringed coast and the crescentic along the coast and eight of consequence in the interior.

Since the establishment of the Republic in 1918, an aggressive advertising campaign by governmental and private agencies revealing the trade opportunities in Finland has brought much tonnage to the ports.

The harbors have ample room for contributed largely to its steady maximum number of ships likely growth. to visit them at a given time for many years to come, but docking facilities need expansion. The depth of the harbors ranges from 8.5 feet alongside the quay in most perts to cations. It concerns itself primaras much as 31.3 feet in the outer port of Viborg. Plans are already provided for the further decrease. provided for the further deepening of those harbors in greatest need of this improvement. All of the harbors are well protected from storm per cent of the total for the Nation, waves with the exception of some portions of the outer harbor of Viborg, soon to be improved by the of imports and exports is explained deepening of a channel leading to by the nature of the goods involved

The most serious handicap to Finnish ports is ice, which com-pletely eliminates most of them from the winter's overseas trade. Only Hango and, in some years, Only Hango and, in some years,
Mariehamn, Mantyluoto, Abo and
Helsingfors continue to share in this
commerce when the ice is either exceptionally thin or when lanes can be cut through it by means of powerful ice breakers.

The ice breaker, first used in 1890, has been improved steadily, until today Finland's fleet of six is considered the world's best. The

National Government feels it incumbent, if an all-year trade is to be maintained, to offer the service of the ice breaker free of charge.

An ice problem of the sort confronting the Finns might have seemingly defeated the efforts of a less patient and persevering folk, but these northern people know no such discouragement. Their successes have been many, not the least of have been many, not the least of which has been the maintenance of open ports throughout the winter.

Four Chief Ports While Finland has a splendid array of ports along its indented and fringed coast line, four ports handle the bulk of the trade and therefore deserve special consideration. A sketch of the activities of the two oldest, Viborg at the head of the Gulf of Finland and Abo at the western century with its spired tower watch-

while Viborg in the east, at the has a delightful setting at the mouth head of the Viborg-Leningrad corridor, has in the past benefited by its position close to the head of the Gulf of Finland and at a point convenient covered islands. The cultural atmosof Finland and at a point convenient for the breaking of bulk along the Hanseatic trade route; Abo in the west, lying as it does nearly at the southwestern extremity of Finland sity and by the revived Swedish Academy whose most flourishing days were experienced during the seventeenth and eighteenth centuries and at the base of an extensive archipelago projecting into those waters where all Baltic trading ships pass, has acted as a trade magnet.
Abo held its own in competition with
all other near-by Finnish ports,
either monopolising or dominating
the trade of the Gulf of Bothnia and
of Finland up to the early nineteenth century.

Minor Centers Björneborg, Raumo, Nystad and other minor centers on the Gulf of Bothnia played some part in foreign trade circles, but none of these cities really ever threatened the early positions of Abo and Viborg, Helsingfors and Hango have had more re-cent careers, the former acquiring a place of importance after becoming

#### RIGHTS OF AMERICAN INDIANS DEFENDED ANEW IN CALIFORNIA

Breaking Up of Tribal Life and Restrictions on Citizenship Draw Sharp Criticism

LOS ANGELES (Staff Correspond- to place them in prison for periods ence) - Congressional investigation of the Indian Bureau and the abolition of organized attempts to break up tribal life are necessary to stop the alleged ill-treatment which American Indians are at present receiving, the meeting, which was sponsol it was declared by speakers before a by the Los Angeles Chamber meeting of the Indian Defense Assoclation of Southern California held

John Collier, executive secetary of the American Indian Defense Association, declared that methods at pres-

Mr. Collier criticized the allotment of Indian lands and the asserted gov-ernmental policy of taking children of six years of age from their parents, who, he said, are not allowed to see them again until they were 18 years

James A. Frear (R.), Representa-tive from Wisconsin, told the meeting that white men have more to apolo-gize for in the treatment accorded Indians in California than in any other state in the Union. He dealt at length with the treatment accorded so-called "restricted" Indians by the Indian Bureau, declaring that their property, their land, their valuable mineral rights are adminis tered by this bureau in a way directly letrimental to the Indian owners. Indians of the Navajo tribe, he said

recently were forced to pay \$100,000 for a bridge for which they have no use, but which the Santa Fe Railway uses in the transportation of white tourists. Many similar acts of the In-dian Bureau were recounted by Mr. Frear, who also described the government policy of "kidnaping" Indian children, who are taken to nonreser-vation schools where they are separated from their parents for many years.

He credited Mr. Collier with preventing the passage by Congress of a bill which would have placed a single judge in each Indian tribe who would have authority to arrest Indians for asserted violations o bureau regulations, and without the enefit of counsel or trial by jury the possibility of bail or appea hones Waverly 4263, Cheltenham 251

## Art News and Comment—Musical Events

## Annual Carnegie International

Special Correspondence THE art season in the United States was inaugurated by the presentation of the Carnegie Institute's twenty-fifth annual international exhibition on Oct. 14. Art critics and art patrons journeyed from the east and the west to appraise the collection of European and American paintings secured by Di-rector Homer Saint-Gaudens and his

The prize awards are as always a controversial matter arousing again the mooted question of the fallibility of the jury system. The first prize painting, "Horitia and Fabiola," by Ferruccio Ferrazzi (Italian) is too confused in mood to be a good performance. Ferrazzi attempts to comhis chief device to insure dramatic symbolism of the portrait. interest; while he has painted the woman's face and the child's face and figure with the gentleness of the old standards than is the Lavery. "The

The second prize painting, "Faun and Nymph Under a Tree," by K. X. Roussel, is an agreeable sketch

"Mountebanks and Thieves," by Robert Spencer, awarded third prize, vindicates the genre type of painting, so long in disrepute Spencer has refrained from leaving his the stark state which modernists render so startling. He has sacrificed tions impossible to borrow for a the temporary brilliancy for a more decorous stability. Likewise he has sensitive study of one of the French seasoned his color unal it is mellowed as with time. His tapestry like port. Vuillard, also allied with Bonmethod of applying color produces an underlying glow of warmth that is characteristic of the living reality of the type of building he paints.

Max Kuehne

Max Kuehne's "Rocky Neck," awarded the first honorable mention carrying with it a money prize of \$300, is worthy of its honor. Kuehne constructs the picture with due rein the small harbor town is keyed rather lower than the precipitate summer amateur painter would essay it. Kuehne marshals the lively forms of the fishermen's houses into a compact ensemble which neutralizes the picturesque pitfalls of the subject and renders the style sound in substance over and above the charm of an adroit pattern.

"Man with Guitar." by John Carroll, awarded an honorable mention, shows Carroll's love for almost sweet color superimposed upon forms too obviously virile. There is much that is reminiscent of the influence of Carroll's mentors. Bellows and Speicher Carroll has yet to master an abso-

lute style of his own. Dod Proctor, the wife of the English painter, Ernest Proctor, like Carroll, wins an honorable mention with a figure study, "The Back Bed-Mrs. Proctor employs a more economic scheme of composition, using every portion of her canvas to the side of duliness in about the berantly youthful. Ettore Tito makes me degree that the Carroll veers toward sweetness.

An Austrian

Menton," awarded honorable mensucceeds completely where Carroll and Dod Proctor are only partially convincing. Faistauer, the Austrian, has built up a composition intrinsically strong by reason of the distribution of the geometric with elegant folk in holiday attire. masses developed by the shapes of the houses and their relation to each other as they pile up from the shore of the sea. In addition to a basically energetic composition, Faistauer has enriched the structure by wisely controlled splendor of color.

Walter Sickert is in direct antithesis to Faistauer for he displays
neither a well designed canvas nor
felicity of color in "Versailles," which
was awarded the \$500 prize contributed by the Garden Club of
Allegheny County.

The British French, and German
A. J. Bauer, and Lizzy Ansingh, bring

The British, French, and German

subject, "Tights and Tarlatan." Painting seems a much less forceful than the aquatint which Mrs. Knight has employed in a series of similar subjects. Augustus John is present with three portraits, one of the popular Hugh Walpole, with an expression such as we cannot associate with Mr. Walpole's friendly personality; an El Grecoish version of the South African poet, Roy Camp-bell; and a woman violinist bedecked

Pittsburgh respondence in the United arated by the c Carnegie Innual internations with so many feathers, we suspect she intends to play "Humoresque." A. J. Munnings has done correct study of the king's horses and 'the king's men in "The Royal Carriage Waiting for Their Majesties in Duke's Lane Windsor Park on Ascot Gold. Lane, Windsor Park, on Ascot Gold Cup Day." Meticulous as the picture is, it demonstrates admirably that most characteristic quality of Eng-lish art, which is, technical excel-

lence.

The quality of uniform technical associates of the department of fine skill carries along Sir William Orpen's "Closing Time, Avignon," a canvas which is almost devoid of the painter's justly celebrated wit. Only in the langorous yawn of one of the tigers in the cage, where the keeper slumbers, is Orpen's adroit wit exercised.

Sir John Lavery, on the other bine his pictorial researches in the hand, shows one of the most imways of modernism with his gleenings from traditional sources. Consequently, we find that Ferrazzi has
treated the architectural background from and faint treated the architectural background green and faint mauve seen with and the woman's figure in modern Lady Lavery's translucent face exfashion, using geometrical forms as

Italian masters. The finesse with Artist's Mother" is painted without which Ferrazzi has applied his unsentimentality, either of technic or usual scheme of blue and yellow al-most makes one forgive the aridity It is a dignified portrait of a woman of fine character.

The French Group

Passing on to the French section showing a feun and nymph in a one finds the painter Bonnard, who properly verdant landscape, while is represented by two still-life paint-the careless, azure clouds frolic in ings. The type of painting in which the careless, azure clouds from ings. The type of paneling the sky. The ambiency enveloping Bonnard professes himself to be most interested in, will unhappily never interested in, will unhappily never really excellent abstract design in nard, suffers in a general exhibition loan exhibition, is represented by a nard, shows a reticently colored interior, "Woman Sewing."
Forain, one of the strong group of

versatile Frenchmen, shows a "Dancer Resting," a profoundly rich versatile

Henri Martin, Henri Eugene Le

In the German section, the old guard is well represented in the works of Hugo von Habermann, Emil Orlik, Max Slevogt, Paul Plontke, Max Liebermann, Otto Dill, and Ulrich Hübner. Franz von Stuck, of ever-surprising imagination shows a three or characteristics and the order of the summer at Ravinia, obtaining just sufficient vacation after that rather strenuous engagement closes to enable it to come to its work in Orchestra Hall revitalized and eager. Stuck, of ever-surprising imagina-tion, shows athletic baby fauns engaged in the strenuous pastime of

The Spanish group has many cancases by names familiar to Americans, including a landscape rejoicrasa; a sincerely grave religious processional by Solana; a serene and splendid decorative canvas in "Garden of Jativa" by Santiago Rusinol, and two episodes in the lives of theatrically posed peasants of the Basque lands by Ramon and

Valentin de Zubiaurre.

The Italian section shows the veta popular gesture in two genre paintings, "The Pirates" carrying off a beautiful maiden, and "Break-Antoine Faistauer in "Old Village, fast," showing handsome vagabon children snatching the morning's spaghetti like young fledglings. Emma Ciardi in "A Nuptial Day"

In the groups from nations hav-ing smaller sections, one notes as pleasing acquaintances, Anna Bo-berg and Gustaf Fjaestad in the Scandinavian room, both of whom give intimate versions of the exotic charm of the Arctic region. Olga Bozanska, who is one of the most

A. J. Bauer, and Lizzy Ansingh, bring sections proffer so many names dis-tinguished in contemporary art that a Till Eulengenspiel sort of canvas one may give but brief mention even called "Chimera" juggles about sail-to the eminent.

In the English section one finds Madonna, the Witch of Endor or her Laura Knight with a Russian ballet double, and Salome in a bewildering maze, without sequence of idea. Bauer, as ever, goes to the Orient which he paints with greater sensi tiveness than any of his European contemporaries, for he cannily dis-poses the individual in his paintings so that the personality is mingled

with the background, thus evading the more direct European.

It is in the French section that one finds the names associated with the days of 1913 and the Armory show in New York when art was a sensation. Looking at the capyeage of tion. Looking at the canvases of the representative Frenchmen of today at the Carnegie Institute, one discovers that Picasso hangs cheek by jowl in docile fashion with Le Sidaner; and that the coal-eyed, pink and gray creatures of Marie Laurencin are in proximity to the practical children painted by Blanche. Duno yer de Segonzac is about the only one to exhibit a painting challenging identification. It is entitled, "Bathers," but more nearly resembles a still life magnified defiantly into a pictorial labyrinth of a nondescript brown color.

Derain and Marisse, two grea names in the modernist category elucidate the weakness of the French section, because almost all of the paintings by the modernists have been lent by Parisian dealers. It is essible to secure the loan of paintings by the popular Frenchmen directly since they have none. An appeal to the French art dealers results in the presence of second string things for the long period of the exhibition in America, presup-poses that the dealers do not intend to hazard the loss of a sale of an important canvas for a problematical prestige in the United States.

It has been impossible in a review so limited in space to present a complete picture of the Carnegie international exhibition. There are many paintings in the various European sections which command the attention. The American group of 106 paintings requires a separate

It is probable that the conductor ture of the public. For while it is of the Chicago Symphony Orchestra true that a few of Beethoven's string elected to put Mendelssohn's Scherzo quartets have been played in Chifrom the music to "A Midsummer cago's concert halls, the greater Night's Dream" into his scheme of number of them, and particularly the later works, have not. The quartets of the last period are still standing Yeschke, to show what he could do, in that arid domain wherein are grouped the products of art which have eluded the comprehension or the affections of the world. Mr. Gordon and his colleagues have taken the first step in the direction of a better liking on the part of the public, because of a better understanding, of these works.

> Plans for the Opera Season Of the performance only words of hearty praise must be set forth. The quartet played with that unity of feeling which is, of course, the first essential of good ensemble playing; but it went further than that. It gave beauty of tone and imaginative ex pression to the music and a certain clarity of interpretation which, in the case of the Opus 127 particularly made listening a joy. There is considerable activity at the Auditorium, Chicago, for the new

on of the Chicago Civic Opera season of the Chicago Civic Opera
Company will open Nov. 3 and rehearsals for it have begun. Herbert
M. Johnson, manager of the organization, and Giorgio Polacco, its musical director, have returned from
their annual expedition to Europe in
search of novelties and singers and
their accomplishments are herewith
set forth.

The work which will open the season will be Verdi's "Aida." Of New Singer

The work which will open the season will be Verdi's "Aida." Of greater interest, or, at least, of greater novelty, will be four operas

greater interest, or, at least, of greater interest, or, at least, of greater novelty, will be four operas which will be presented for the first time in this city. These will comprise Honegger's "Judith," "La Cena delle Beffe" by Giordano, Eugen d'Albert's "Tiefland" and "The Witch of Salem," by Charles W. Cadman.

The Novelties

"Judith," which was performed for the first time last February at Monte Carlo, will receive its American première when the Chicago company stages it in the latter portion of the season. The work is written in two acts, divided into four scenes, but as it endures for only an hour and 45 minutes another compesition will be sung in conjunction with it. Honegger's opera is an addition to the already lengthy list of dramatic compositions which have concerned themselves with Judith and Holofernes—a list of which stretches back to the eighteenth century. The music, Mr. Polacco affirms, is remarkably difficult but not less colorful, and the conductor believes that the power of the work will make a deep impression. Miss lieves that the power of the work will make a deep impression. Miss Mary Garden is cast for all of the mean means of the mean means of the means of

will make a deep impression. Miss Mary Garden is cast for the title rôle.

Giordano's "La Cena delle Beffe" will be a novelty only to Chicago, for the 'opera was one of the productions at the Metropolitan, New York, at the beginning of this was given at the Auditorium by Fortune Gallo's company a season or two ago. No new conductors have been on-gaged. Giorgio Polacco, Roberto Moranzoni, Frank St. Leger and at the beginning of this year. D'Albert's "Tiefland," too, was first heard at the Metropolitan, but that was 18 Henry G. Weber will divide the years ago and in German, the lan-guage in which its composer put it son's work. Serge Oukrainaly is re-tained as ballet master and Charles into sound. Mr. Johnson's forces at Moor returns as stage director. The season will last for 12 weeks in the Auditorium are scheduled to sing "Tiefland" in English and Claudio Muzio will be given the part of Chicago and on Jan. 31 the co

## Try these three new recipes for a real treat at home

"CANADA DRY" is a drink of such rare excellence . . . flavor . . . and character that it blends delightfully with other beverages.

Here are three new recipes that we believe you will like. Cut them out and paste them in your Cook Book so that you will have them for reference.

"Canada Dry" Fruit Lemonade

A most refreshing beverage may be prepared by combining the juices of one-half lemon and one orange. Stir in a dessert spoon of powdered sugar. Add one bottle of "Canada Dry" and serve with slice of orange and maraschino cherry in glass with cracked ice. (Sufficient for two persons.)

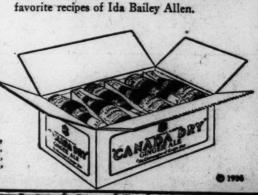

"Canada Dry" Cup de Luxe

Combine four tablespoons grenadine syrup with the juice of one-half grapefruit and the juice of one orange and one-half mediumsize pineapple. Stir in six tablespoons grape juice. Add two bottles of "Canada Dry." Serve with cracked ice. (Sufficient for five

Continental Punch

Combine a quart of grape juice and a pint of orange juice with a half-cup of sugar, a thirdcup of lemon juice, eight sprigs of crushed mint and four bottles of "Canada Dry.' Add two quarts of crushed ice, mix and serve garnished with fresh mint. This will make 36 to 40 sherbet glasses. This is one of the

## BOOK REVIEWS AND LITERARY NEWS

## Lord Oxford. Remains Aloof compiler of a much-needed work on this interesting theme, but it will have to be employed with caution and carefully checked. Even when

A Review by SIR ALFRED ROBBINS

HE Earl of Oxford and Asquith, the British Prime Minister holding that position the longest period of any for a century, has published this book as "a contribution to history written to a large extent from first-hand knowledge." The book would to some extent have established this claim if it had been two on Prime Minister and Cabinet, limited to the 40 years during which in hope of illumination.

But the inherent fault which be-Parliament only 30 years; and the

proportion of these pages. The author has not attempted to absorb and fuse his material; and he has even carried the habit of appropri--that made at Newport at a time the Conservative leaders were carrying on a warm firtation with Mr. Parnell—he adds in a note: "This is from Morley's summarized version of the speech."

Quits Discussion of War

Having handicapped himself at the outset by dealing in the opening 147 with which he had no personal association, and obviously little close acquaintance, Lord Oxford has further fettered himself by the deliberate omission of "one relevant topic of capital importance: the most interested in the last chapter causes of, and our preparations for, of all, dealing with Political Catchthe Great War." He gives reasons words. This will be of use to the for this, which can fairly be pleaded in extenuation; but the omission of necessity takes away completeness

But this might have been almost more than made up for if he had thrown any really fresh light on the men and matters of a period in which e played so active a part. This he fails in singular degree to do. Acute as he showed himself as a political strategist, Lord Oxford was never a keen judge of men. He drew his friends and chose his coadjutors—as far in the latter case as parliamen tary stress would allow-from a nar row and pedantic ring. His faithful-ness to those friends, in striking and st gratifying contrast to more than one Prime Minister of later days, was so complete, indeed, as ultimately to contribute largely to his political undoing! But the lack of clear insight into the character of those with whom he was socially or intellectually out of sympathy has hampered him now as an author just as it has

ione as a politician. A Great Expositor

Yet Lord Oxford's parliamentary gifts are such that, with his personal knowledge, he might have made a contribution to the political history of the British Empire for the past 40 years which would have proved of lasting value. Judging from my own long and intimate acquaintance with the life of Westminster, I should rank Gladstone as the most impressive orator, Chamberlain the most effective debater and Asquith the most efficient expositor England for half a century has possessed. In the art of clear, concise and reasoned exposition of parliamentary policy or political sim, Lord Oxford stands far beyond any of his con-temporaries. This gift was carried to the highest in his great speeches on the outbreak of war—speeches for which he should always be given the country's gratitude, as having put beyond doubting the united resolu-tion of the British people to prosecute the struggle to a successful end. Yet even at the very time the then Prime Minister was rendering this mighty service to his fellow citizens, those who were moving on the inside of things, and whose knowledge was not limited to a sin-gle political party or social coterie, were aware of manifestations of those temperamental limitations which assisted in hampering the earlier operations of the war, necessitated the first Coalition Cabinet, and ultimately broke Lord Oxford as a political force.

One feels these temperamental limitations when reading this book. Lord Oxford throws no truly fresh the Great Trek, and here is the whole light on politicians, however able or story of the endeavor of the Boer powerful, with whom he had had no farmers to get away from British rule, and whatever one's nationality, personal kinship or social connecpersonal kinship or social connection. He was one of the counsel for trekkers who, Bible in hand, set Parnell and his Irish Nationalist col- their faces northward and eastward leagues during the Special Commission trial of some 40 years since; but, though thus brought into close conversational contact with that singular and still mysterious man, he adds nothing to our knowledge. Because he and the select band of aristocrats and would-be aristocrats associated with the forgotten Liberal Imperialist movement had a lofty intellectual contempt for Campbell-Bannerman, which some of them did not attempt in public to hide, that astute Scotsman, by a maneuver leagues during the Special Commis- to find the freedom they sought. The astute Scotsman, by a maneuver Lord Oxford even now does not seem to realize, secured Lord Rosebery's banishment from active political life, and bound to his own fortunes those and bound to his own fortunes those leading "Lib. Imps." who had tried their hardest to jockey him out of the Liberal leadership. High thinking uncombined with plain living—for, as Lord Oxford admita, these politicians, when in a difficulty, always "greatly daring, dined"—proved of no practical parliamentary use divorced from public opinion; and the lesson is useful still.

Therefore, though a procession

of Oxford and Asquifh. London: Cassell. 50s. not. Boston: Little, Brown & Co. 35. noteworthy English political-figures of the late Victorian, entire Edwardian and earlier Georgian periods, the provider of the pageant gives little concerning them which adds to our real knowledge of their motives and character. It is all seen under a hard light, with no atmosphere, never giving the subtle reve-lation begotten by a lightning flash

Its author sat in the House of Com-mons, and ultimately became its sets the earlier pages of the work leader. It is not without significance, in estimating its value as "a contri-bution to history," that Lord Oxford represents himself in a loosely con-structed sentence as having sat in much that is fresh into such chapestimate is further affected by the ters as these. But the habit of quo estimate is further affected by the ters as these. But the habit of quofact that the opening 150 pages are a tation is too strong to be withstood. Lord Oxford gives Lord Morley, Sir somewhat crude kind. Lord Morley's "Gladstone," Buckle's "Beaconsfield," A. G. Gardiner's "Harcourt," Morris "Harcourt," Morris "Harcourt," Morris "Harcourt," Morris "Harcourt," Morris "Harcourt," who ley's "Recollections," and Winston Churchill's biography of his father, relations under modern conditions Lord Randolph, are drawn upon for extracts which fill an unduly large net. Yet, though he quotes a letter from Morley to himself, stating that "the chapter of my book upon the Cabinet was in truth the work of W. E. G.," he never seems to have ation so far that, in dealing with one heard that Gladstone, the greatest of Lord Salisbury's most historic statesman of them all, had written essays dealing with the relations referred to before some of these others had come into note. Notably was this the case in his historic article in the North American Re view for September, 1878, entitled 'Kin Beyond Sea," testifying to his high regard for American institu-tions, while comparing them in some respects with those with pages with a parliamentary period which he was so exceptionally acquainted.

Political Catchwords The general reader, who has little concern with past political struggles and partisan rivalries, is likely to be words. This will be of use to the

Lord Oxford gives himself as the authority, he is an unsafe guide. He attributes, for example, the invention of the once popular nickname "Jingo" to Sir Wilfrid Lawson; but it was that of a far keener thinker and, in many ways, more capable politician, the once powerful but now forgotten George Jacob Holyoake. He seems unaware that the phrase "found salvation," as applied to Bannerman. He has not traced "Perish India" back to one of the ost famous elaculations of the illustrious Vergniaud in the French Convention; nor the Cave of Adullam illustration for an English political minority to the utterance of a London member of the House of Commons in 1835. Venial Slips

As to the "educating of a party," the chief complaint against Disraeli, when he made this claim on parliamentary reform in 1867, was his use of the words, "I have educated my party," the egotistic vaunt being watered down to "We have educated our party," in the authorized version. Randolph Churchill's "I forgot Goschen" was precisely anticipated according to M. Hanotaux, the historian of contemporary France, by Thiers when suddenly supplanted in the French Presidency by Marshal MacMahon. These are venial slips; but to present Oscar Wilde as in any way responsible for the one-time vogue of the phrase "the Nonconformist conscience" is nothing short of lamentable, seeing that it was first publicly used—concerning which there is no shadow of a doubt—over the downfall of Parnell, by so eminent a Wesleyan Methodist as the Rev. Hugh Price Hughes.

Yet Lord Oxford's imperturbable and semi-contemptuous humor is shown in not dwelling on the gross injustice done to him by the deliber ate travesty for partisan purposes of "Wait and see," one of his two con-tributions to political phraseology the other being "ploughing the sands." This aloofness characterizes the man. His apparent lack of sen sitiveness to poignant things is a heavy drawback in a British states-

In Memoriam Ferracelo Busoni, by Jacob Wassermann. Berlin: S. Fischer.

T IS more than two years since Ferruccio Busoni passed away. And though, of course, part of his activity has been removed, there is another part that cannot be extinguished. For Ferruccio Busoni was not simply a musician those Gladstonians who first accepted a man of almost unlimited intellectione Rule, was due to Campbell-tual ambition. So it was more than natural that he attracted not only his fellow musicians but everyone development of his powers during playing a part in the intellectual de-velopment of his time. He was as much a philosopher and a natural turity. Wassermann sees in Busoni scientist as a musician. Above all, the final phenomenon of an epoch, he was an artist in the widest sense the prophet of a new age. Of course,

found. This man, full of problems.

Saw in his house the best men of his time. His pupils were his first and unconditional admirers, to such an siasm, the inner conviction with extent that they were in danger of losing their independence. Notwith-standing, Busoni had a deep respect for independent people.

Busonl and the War There came one moment when the the bemoeratic Way of Life, by Thomas industrial days, is to court humiliation and disaster.

The Democratic Way of Life, by Thomas industrial days, is to court humiliation and disaster.

The Democratic Way of Life, by Thomas industrial days, is to court humiliation and disaster.

#### A VICTORIAN AMERICAN~ Henry Wadsworth Longfellow

Wit Mr. Gorman makes America's great popular poet a human figure. He paints a glowing, revealing portrait of Victorian America, of Victorian Europe, too. A fascinating, scintillating, readable biography, and an important critique.

by Herbert Gorman

\$5.00 at all booksellers

DORAN BOOKS

however, be ironical and satirical in opposition until an authoritative ar-gument surprised him and made him humble.

which he fulfilled his task. Busoni's father was Italian; his mother was an Austro-German by birth. He could not be considered as a southern man, though, of course, his strong aversion to all that was shapeless. It was embodied for him in Russian art. There was something in him that was reminiscent of E. T. A. Hoffmann's Kappellmeister that in character he was a northerner, and that German music (Bach and Mozart) was his ideal.

The word artist was the proudest descent. But it cannot be denied that in character he was a northerner, and that German music (Bach and Mozart) was his ideal.

The word artist was the proudest title he could confer on a person. He did not give it easily. I spoke above of the great respect he felt for intellectual independence. He could.

Of Men with

Into the opera "Doctor Faust,"
which filled the latter years, he
wrote himself, for Busoni was a kind
of Faust. These contradictions made
him interesting and strangely dimcult to understand. This is what Wassermann's book, written by a man of great imaginative power, makes particularly clear.

An Intellectual Mélange

which happens in some fundamental respects, the "divinity of brotherhood" is allowed precedence. And this brings him to the concrete development of the theory

Work as an End

I'nder the heading of Fraternity, brotherhood has been raised by the author to the level of a religious faitb. Under the headings of Liberty and Equality, brotherhood is united to industrialism in such a way that, work being carried on in the joy of companionship, the work itself becomes an all-satisfying end and aim of existence. This result is atsome deep-lying reason," he tells us "human life is not good if detached But man, who is completely cowed if he feels that he is really alone, will brave the whole universe when he knows that he is reinforced un-This seems to be good-mixership with a vengeance. We would fain stop and assimilate the proposition. becomes an all-satisfying end and aim of existence. This result is attained by a process too complex to explain; in fact, Mr. Smith leaves much of it unexplained. Suffice it to say that everyone must mix, and to mix properly everyone must be equal, not only in general status but in wealth. The rich man, Mr. Smith thinks, has all the good things of life, while as for the poor man, "friendship itself... is not available to the poor on the same easy pany. \$2.50.

## Women's Enterprises, Fashions and Activities

#### A. D. Jones, Customs Broker

States.

OMPARING an inscription on the door of an office in a downtown building in Kansas City, Mo., with a paper he held in his hand, a native of Japan pushed open the door and antavad.

Supplies and raw materials were manipulated by this woman at her desk in the heart of the country. Train after train, laden with ores from South America, Australia and the Orient, bound for smelters in the door and entered.

woman was seated at a desk. She looked inquiringly at the visitor. The Japanese hesitated, started to speak, gulped and retreated in confusion.

Again he compared the words on the door with those on the slip of paper, and again he opened that door. This time he spoke, but since his vocabulary comprised few words of English, it was some time before the woman at the desk was able to understand that he was looking for Mr. Jones, the customs broker.

The woman smiled. Although that was 20 years ago and the sign on or had been there only a few days, there was no hesitancy in her manner as she replied briskly, There is no Mr. Jones, customs broker, but I am Mrs. Jones and I

will do my best to help you."

The Oriental gasped. Directly from a country where a woman in any line of business was something unthinkable, this was almost too much. His expression distinctly conveyed the idea that he would prefer to be back in his native land, where women could not possibly be customs brokers. But there was no help for him, and he finally managed to impart the information that he was ing an Oriental shop and had an invoice for a shipment of goods from Japan, China and India which included everything he could possibly within the next score of years. He desired the duty computed. Despite his misgivings that a womcould not possibly handle such intricate and entirely masculine affair, Mrs. Jones completed it deftly and helped him with his business arrangements, so that in a short time his shop was flourishing. He still considers her the most wonderful woman in America.

And, indeed, the foreigner was entitled to a measure of his surprise for so far as the writer knows, Mrs. Jones was the first woman in the world to embark upon this professional career.

The encounter, however, which she long experience, was the beginning of a career in a field she pioneered for women, and her un-qualified success has led several others in various American cities to follow in her footsteps.

Familiar With Legal Decisions A recent visitor found Mrs. Jones itting at a desk piled high with in-

tricate-looking documents, many of them in foreign languages, covered with figures computing money in for-eign exchanges. She wore a blue gown, severely tailored and yet pleasing, and her hair waved softly back from an attractive, motherly

The telephone rang. Instantly vanished all doubts as to her ability to handle involved statements. In a businesslike voice she answered questions from one of the largest concerns in the west as to the duties on a recent foreign shipment amounting to several hundred thou-

Gentlemen By Freight

A few moments later the telephone rang again "Two gentlemen from Bolivia have arrived at the freight office," a voice announced. "Can you come down and give us some information as to the proper routine

#### Luminous Cushions

O SEE dainty Mile. Germaine Martel in her little studio near Place St. Augustin, Paris, one would never associate her with anything so serious as inventing or zebra arriving from some tropical country for the zoological gardens.

Mrs. Jones always sidetracks other work temporarily when animals are in transit, in order to get them out of their confinement as quickly as

> essary patents. If one asks Mile. Martel how she urious divan or thrown down as floor pillow in a dark corner, at once diffusing a becoming glow and enlivening the shadows, she will reply that the idea came to her one evening at a theater in Paris. The stage setting was a charming living-room, showing intimate groupings of easy chairs, divans and tables with artistically shaded lamps, but Mile. Martel's trained eye noted the dark spots caused by the heavy pieces of upholstered furniture.

How to throw light into these shadows was the question she began asking herself. When she reached ome that night she started to experiment with shimmering metallic fabrics; later she tried tiny lights attached to long cords, which she partially concealed behind the pillows of the divans. Finally, she began throwing light under transparent fabrics mounted as pillows and tossed down in the darkest of the shadows. She felt then that she was making some headway. This led to her present method of setting into pillows of substantial material exquisitely painted or hand-embroid-ered designs on a transparent fabric, her special lighting device being arranged under the transparent inset. By merely pressing a button, as for an electric lamp, the illuminated transparency appears in all its

On the most expensive of the radiant pillows there are two insets usually in corners diagonally op posite. The less costly pillows have but one inset, the shape of such cushions being usually round or oval and requiring but one transparency To see a bouquet of flowers in nat-ural colors blossom in one corner of a soft silken cushion and perhaps a marvelously-tinted butterfly appear winging its way from the opposite side, is mysterious and thrilling to the observer.

Until Mile. Martel has unsnapped section of the covering from one if these mysteriously illumined cushions and displayed the strong circular frame which holds the ring of small electric bulbs, one cannot believe that anything substantial can be hidden away in this soft, crushable elderdown pillow. Examination shows that an ingenious arrange-ment of fine springs protects the fixture from damage and the entire cushion is absolutely fireproof. A

valued and recently at sales in Amsterdam and Paris she was intrusted and to have pillows to match new furnishings.

One of Mile. Martel's latest de signs is a fluffy pillow covered with lustrous black satin The inset is of extremists, she admires the French flesh-colored georgette, showing a modern school; she likes cubistic art, which she is convinced has a eries in delicate blue tones. The least movement in the room or the

lightest breeze stirs the draperies. "I love my work so much," says Mile. Martel, "that I see every-where designs that I can use. With In spite of an exceptionally strenuous and responsible profession, it is
obvious that she is very happy in
her work. Moreover—the busiest
people having proverbially the most vice, furnish the most artistic item of decoration I have ever seen."

Tweed Coat in Tones of Rose Brown is Here Shown for a Young Girl. The Child's Coat is Composed of Blue Kasha With Suede Leather in a Deeper The Dress for the Middle-Sized Girl Is of Blue-and-White Pin-Check Kasha With a Navy Blue Duvetyn Sleeveless Coat.

#### Fashions in Children's Clothes

The child's coat is composed of blue London kasha with suede leather in a deeper tone. The dress for the middle-sized Special Correspondence THE soft wool and kasha mate-THE soft wool and kasha materials that have come into vogue kasha with a navy blue duvetyn omit the vanilla and serve with during the last few seasons are Previously, the difficulty was to make warm clothes in miniature sizes without the seams being hard and dress or one of silk tricot; dresses number of people. of the latter are now made in the scrubby; today these garments may most diminutive sizes. be almost as light and soft as gan also finds a place in the juvenile wardrobe. A sleeveless coat of vel-

swansdown. Delightful coats are expressed in kasha and soft tweeds. Some are rimmed with leather in the form of edging cut in small scallops that may be slightly fringed at the edge, and not more than one-eighth of an inch deep. Hats also are made of kasha and tweed to match the coat, and may be finished with the same trimming. Such ensembles carry out the idea of tone expression, rather than bright contrast, which has been so noticeable in clothes for grownups. There is some evidence of cubist notions in the fashions for the young girl. These are carried out in dark-tone strappings and inset triangular pieces. This style may be primarily for l'enfant français rather than her English sister, for the simple styles suit the latter best. The nearest approach to this style is in garments made of tweed where one sees inset strappings and geometrical pieces of a lighter tweed that may be woven in a diagonal

pattern. The colors chiefly noticeable in

#### LIQUIDATION APPARENT ON 'ALL RALLIES

#### Price Movements of Stock Market Decidedly Irregular

NEW YORK, Oct. 20 (P)—Stock prices moved irregularly lower at the opening of today's market. Selling pressure was renewed Selling pressure was renewed against a wide assortment of industrials, but the rails received better support on the execution of a large volume of overnight buying orders in

that group.

Most of the changes were fractional in character, International Cement sagging to a new low level for the year. General Motors opened unchanged, but U. S. Steel common opened with a block of 3500 shares at

135, off 1/2.

Mixed price movements during the early trading reflected the struggle of opposing speculative forces for control

the market. In the first outbreak of selling, Commercial Solvents B and Pullman each broke 3 points, and Coca Cola, Remington Typewriter, American Car & Foundry, Butterick Publishing, Lehigh Valley and several others fell back a point or two, with American Linseed, Gulf States Steel and Fairbanks Morse touching new low levels for the year.
United States Steel common sank to

the lowest price since last June, and General Motors duplicated yesterday's low, but strong buying support made its appearance and carried both issues bove yesterday's final quotations. On the rebound, Case Threshing and International Telephone quickly ral-

lied 2 points.

With the exception of sterling, which dropped to a new 1926 low at \$4.84% for demand bills, the foreign exchanges were firm. French francs rallied within a few points of 3 cents, and Italian lire touched a new high for the year at 4.29 cents.

The forenoon market was largely a succession of advances and declines, in which the swings in some of the high priced shares were unusually

wide.
Rallies were availed of for fresh liquidation and short selling, but when the declines began to take on formidable proportions in certain stocks, supporting orders were rushed in to check the break.

the break.

Du Pont, after rising 3½ to 317½.

went down to 310%; United States

Cast Iron Pipe moved up 5½ to 197½.

and then lost it all, and Continental

Baking A grashed 7½ to 50½, a new

low figure for the year.

United States Steel got down to

134%, and General Motors to 142½,

both under vesterday's low prices.

both under yesterday's low prices.

The renewal rate on call loans was muchanged at 4½ per cent.

Government Bonds Active Buying of United States and foreign government obligations accounted for a part of the activty in teday's trad-

ing with prices holding fairly firm.

The easier tone of the money market favored Liberty and Treasury bonds, some of which sold at the highest prices in several months. Foreign obligations responded to the predictions of financial leaders that the removal of trade an dtariff barriers in Europe, advo-cated by the bankers of 16 nations would result in far reaching economic

In the domestic railroad group, In the domestic railroad group, sandard investment issues, such as Union Pacific, Pennsylvania and New York Central liens, made a better showing than bonds o fa semi-speculative caliber. "Katy" adjustment 5s were under considerable pressure. Reports that new interests might acquire control of the Warner Sugar Company started a buying movement in these bonds which carried prices substantially higher. On the other

in these bonds which carried prices substantially higher. On the other hand, scattered selling of Cuban Sugar heavy hurricane damage on the island.

EATON AXLE COMPANY PROFIT Eaton Axle Company, for the quarter ended Sept, 30 reports profit after charges but before Federal taxes of \$303,542, compared with \$200,066 in third quarter of 1925; nine months profit \$972,773 after above charges, compared with \$605,641 the like period of 1925.

BEECHNUT PACKING PROFITS Net profits of Beechnut Packing Company for the third quarter declined to \$605,811 before Federal taxes, from \$758,-844 in the tike period of 1925 and for the nine months this year to \$1,954,187 from \$2,111,034 a year ago.

HARBISON WALKER EARNINGS Net profit of Harbison Walker Refrac-tories for the nine months this year rose to \$2.880.000 from \$2,407,000 in the like period of 1925. BY ATLANTIC COAST LINE

Declines 50 Points in Last 3 Weeks—Earnings Likely to Equal 1925 Year

In the last six weeks, the stock of the Atlantic Coast Line Railroad has declined approximately 50 points, a larger drop proportionately than has affected the stocks of any of the major carriers. This slump is attributed in large part to the damage caused by the Florida hurricane, though some of the decline is undoubtedly part of the general reaction that has been in process since the first of this month. Saturday the stock sold at 189, or 73½ points below the high of the

year made last January, while Tuesday the low was 191. The low point of the year to date was made in the market break of last March when the stock fell to 181½.

While Coast Line's gross and net earnings for August fell somewhat behind those of August, 1925, and while September will also probably show a recession, it should be borne in mind that in the autumn of last year the that in the autumn of last year the road was feeling the effects of the

Embargo In 1925

Late in the fall of 1925, a serious traffic congestion had begun to develop making necessary the imposition of an embargo on Florida traffic on the embargo on Florida traffic on the Coast Line Nov. 1. This naturally greatly hampered business and in-creased the cost of transportation with the result that November showed an increase of only \$190.886 in net operating income over November, 1924, while December actually showed a loss of

The expectation is therefore that November and December gross and net earnings this year will compare favorably with the corresponding months last year, particularly as the devastation caused by the Florida storm has necessitated considerable particularly in reconstruction.

activity in reconstruction. It is true that the movement of fruits out of Florida will be reduced considerbly from last year, particularly considerbly from last year, particularly considerbly from last year, particularly grapefruit and oranges, as a result of storm damage to crops, and, of course, Coast Line which is a large carrier of such products, will naturally feel the effect to some degree.

Last fall and winter there was a ruch of passenger travel to Florida.

rush of passenger travel to Florida. This year, the advance bookings over Atlantic Coast Line are off perhaps 10 per cent in comparison with the corresponding time a year ago, but they are still nearly 100 per cent in excess of 1924 excess of 1924.

Earnings Holding Up

Indications that earnings of Atlantic Coast Line for all of 1926 will not be materially less than those of last year, bearing in mind that the last two months of 1925 were adversely two months of 1925 were adversely affected by congestion and embargoes. For the eight months of this year ended Aug. 31 gross earnings of \$66,772,697 were \$6,550,111, or 10.8 percent ahead of the corresponding period last year, while net operating moome of \$12,848,532 showed a decrease of \$486,827, or 3.6 per cent.

The fact that out of this large gain in gross the commany has been unable.

in gross the company has been unable to save anything for net has, however, been construed somewhat unfavorably. The gain in gross has been largely consumed by an increase of \$3,292,060 in transportation expenses. Mainte-nance expenditure also increased \$2,-031.513 over last year, and there was an increase in taxes and in rentals for equipment and joint facility In 1925, Atlantic Coast Line estab

FREIGHT LOADINGS GREATEST ON RECORD FOR SEASON OF YEAR

WASHINGTON, Oct. 20-Loading of

WASHINGTON, Oct. 20—Loading of revenue freight continues to be the greatest of this senson of the year on record, according to the American Railway Association.

Total for the week of Oct. 9 was 1.184,862 cars. This was a decrease of 662 cars below the preceding week this year, and only 2149 cars below the greatest number of cars loaded during any one week, which was the week of Sept. 18, the total being 1,187,011 cars. This was also an increase of 78,226 cars over the corresponding week in 1923, as well as 95,906 cars above the same week in 1924.

LONDON QUOTATIONS LONDON, Oct. 20—Consols for money today were 54%. De Beers 19e and Rand Mines 3%. Money was 4% per cert; dis-count rates—short bills, 44,604% per cent; three month bills, 4% per cent.

#### WOOL DEMAND CONTINUES ON SOUND BASIS

Stocks of Some Types Are Considerably Reduced

The wool market is proceeding on a very stable basis. During the last week, values have changed very little, but the strength of the situation is patent to even the most casual observer.

At the moment, the market is some-what "spotty," some houses! finding pusiness where others have failed to lo so. The volume of the demand, however, keeps up very well, and the request for prompt shipment is sig-nificant.

Stocks of some types of wool have ecome considerably reduced, and the rool merchants have turned to coun-ry points to repletish their stocks to ome extent, while the manufacturers in some instances have gone into the central and far West for wool, wherever they thought they could buy wool to suit their needs at a slight advantage over the Boston and other seaboard

Buyers have been scouting more or less all over the West for additional stocks of wool. Where purchases have been made latterly they have been close up to the parity of the Boston market and possibly a bit in excess of it in some instances. Further bright wools, mostly of medium quality, have been bought at 42 cents in the grease.

Manufacturing Situation Buyers have gone into Texas to look ever the new fall clip which will be on the market in the near future. The clip, according to local advices, will be a smaller one than usual, although reported to be in about the

The growers and local dealers do not look for any considerable buying until the sealed bid sales are held.

The manufacturing situation is a very sound one, and the mills are very well engaged on current orders with night shifts being run in some instances, and the consumption of wool proceeding at a very heavy pace.

It is apparent from the manner in which the buying of goods has been done latterly that the clothing and cutting up trade were in a very good position, and that the policy of hand-to-mouth buying which has been in operation for so long has forced the trade in all its branches to buy steadily, even if not in the large quantities that formerly were sold.

Buyers have gone into Texas to look ever the new fall clip which will be on the market in the near future. The clip, according to local advices, will be a smaller one than usual, although reported to be in about the usual condition.

Shearing is about two-thirds over, and the sealed bid sales will not commence until next month.

The growers and local dealers do not look for any considerable buying until the sealed bid sales are held.

The market and the militate with high thirds being run in some instances, and the consumption of wool proceeding at a very heavy puce.

It is apparent from the manner in which the buying of goods has been done latterly that the clothing and cutting up trade were in a very good position, and that the policy of handsto-mouth buying which has been in operation for so long has forced the trade in all its branches to buy standily. Wen if not in the large quantities that formerly were sold.

The margin of profit is a very narrow one in all branches to buy standily. Wen if not in the large quantities that formerly were pegged at \$1.35 for a really choice article have been sold the last week or two at \$1.37% but combers say that they have shut off business the minute they have marked their choice fine tops to \$1.40, and the same is more or less true with reference to other qualities.

Fine Nofis Firm

The position of the comber is being helped out somewhat today by the improvement in the noils are costing 80 cents of better, while some holders of choice and the server strong, also, as and experssing effect upon the warrage fine noils are costing 80 cents of better, while some holders of choice and the second of the comber is being helped out somewhat today by the improvement in the noils market. Fine noils of the better type have reached their choice fine tops to \$1.40, and the average fine noils are costing 80 cents of better, while some holders of choice and the second of the comber is being helped out somewhat today by the improvement in the noils market. Fine fine \$2.50. 10.50. 10.50. The margin of profit is a very narrow one in all branches of the trade still. Fine tops which for a long while were pegged at \$1.35 for a really choice article have been sold the last week or two at \$1.37½ but combers say that they have shut off business the minute they have marked their choice fine tops to \$1.40, and the same is more or less true with reference to other qualities.

The position of the comber is being helped out somewhat today by the improvement in the noils market. Fine noils of the better type have reached the 35 cents level very firmly, and the average fine noils are costing 80 cents or better, while some holders of choice noils are asking 87@88 cents.

The demand for other grades is strong, also, especially quarter-bloods

strong, also, especially quarter-bloods which have been selling at up to 62 bents. The demand for wool wastes of all kinds and especially of the better descriptions is reported very strong,

The foreign markets are all steady, with the exception of Bradford, where the failure to settle the coal strike has had a depressing effect upon the market, and prices in tops for the last week showed a decline of about a became.

ing the last week, although it would appear that with the appearance of larger quantities of the new wools, the market is inclined to sag a bit; at least the market is no more than

With the increase in offerings the selection has improved somewhat in Melbourne and American orders have been placed there, with the clean cost averaging at the moment around \$1 clean in bond at Boston, for good combing 64-70s, occasionally slightly more, which is about 5 per cent below the peak of the market earlier in the season.

Japan is competing rather freely, and the Yorkshire contingent is buying cautiously. The demand up to the niddle of October (from July 1) had been sufficient to move some 480,000 bales or about 20 per cent of the clip. Domestic Market

Domestic Market

In South Africa, prices are on a parity with Australia and about 5 per cent below the peak point. Contracting in Uruguay appears to have come to a conclusion and the market there is waiting for shearing with prices held firmly, and what sales are made being mostly for Continental account. In this market, sales have included a very good proportion of domestic wools, more especially of territory wools grading half-blood and finer, for which prices have held steady at \$1.08@1.10 for the best fine and fine medium wool graded for staple, and up to a possible \$1.15 for the best atrictly fine staple wool.

For the best French combing wools, the market is quotable at \$1.06@1.08, clean basis, and for the good to choice half-blood combing at \$1@1.05, clean basis.

Further sales of three-eights combing are reported at 90@94c, and for quarters at 80@85c, clean basis. Sales of bright fleeces are on a parity with the territories.

of bright fleeces are on a parity with the territories. Sales of foreign wools have included

Sales of foreign wools have included Australian 64x70s, good to choice combing wools at \$1@1.03, clean in bond, according to the wool. Demand for New Zealand 46s combing is reported at 35½ to 36 cents and for 44-46s at 33½ to 34 cents in bond, while 56s (three-eights) combing has been sold at the equivalent of \$1, clean basis, duty paid.

Carpet wools are very active, and prices are tending against the

Carpet wools are very active, and prices are tending against the buyer steadily, some dealers contending that they are securing 50 cents clean for the best wools.

the best wools.

Mohair is moderately active with dealers now offering rather under than over 60 cents in the country, although most of the holders there want 62 cents for their grown hair. One lot is reported to have been sold at about 59 cents. Foreign hair is firm with 20 pence asked in Bradford for Turkey fair avenue.

COTTON PRICES

with their crops.

The result has been a steady decline The result has been a steady decline during the last three days to levels where practically 80 per cent of the recovery from the Oct. 8 lows has been

wiped out.

Most of the seiling on the renewed decline is said to be originating in the South. In addition, the "into sight" decline is said to be originating in the 30sth. In addition, the "into sight" movement has been at a record rate, in spite of bad weather in certain sections, and with improving weather conditions, new high levels on the movement are looked for. Spot cotton on the current move has dropped to a new low record for the season at 13 cents.

The accompanying table showing the advance from the Oct. 8 bottoms 106%, 10

†Tuesday's quotation. Still, on the constructive side of the cotton situation, there are a number of factors that should soon make their weight felt. First, there are the numerous offers of financial assistance coming from banking and Government sources to enable the producers to market their crops in an orderly man-ner. Unless there is complete demoral-ization through the southland, this should make for early stabilization of

prices. Then there is the good volume of trade buying, attracted by prevailing prices. Many spinners have purchased some considerable time ahead. Curren consumption is increasing as evidence consumers consider present price

cheap.
Undoubtedly, a good many cotton
to carry farmers are in no position to carry even moderate portions of their crop, and it is this distress selling that is believed responsible for the new dro

some time it is practically certain that next year's acreage will be sub-stantially reduced.

#### MORE MONEY SPENT BY MUNICIPALITIES THAN BY STATES

WASHINGTON, Oct. 20-Municipalities are spending more on opera-tion and improvements than the states and are rapidly sinking in debt in the

process.

After studying such expenditures of 247 cities of more than 30,000 population, the Department of Commerce says that outlay for the fiscal year 1925 was \$1,525,556.704, or 80 per cent larger than similar expenditures by the 48 states, and only 14 per cen less than comparable federal expendi

tures.

Net indebtedness for cities was \$4.659,629,234, an increase of 10.2 per cent over the previous year. Among the 247, only 79 cities reduced indebtedness. Atlantic City reported the largest per capita net debt of \$277.98.

Washington D. C. Washington, D. C., was the only city free from net indebtedness. Of the total city expenditures of \$1,525,556,-704 or \$27.43 704, or \$37.43 per capita, operation of utilities cost \$146,602,539, interest on debts amounted to \$266,009,621, and permanent improvements \$875,822,096.
Only two of the 247 cities lacked sufficient revenue to meet operating d interest charges, while 44 had a

surplus to apply on debts.

Receipts totaled \$2,508,924,366, or Receipts totaled \$2,508,924,366, or \$61.5 per capita. Revenue receipts were divided as follows: General property taxes \$1,597,490,523; special taxes \$61,491,072; licenses \$72,791,212; special assessments \$124,347,377; subventions, donations, pension assessments \$127,-265,880; interests, rents and highway privileges \$118,606,532; earnings of public service enterprises \$257,743,727; poil taxes, fines, and miscellaneous \$89,190,043.

The largest per capita revenue was

The largest per capita revenue was \$143.12, for Pasadena, Calif., and the lowest \$22.68 for Norristown, Pa.

#### LONDON STOCKS ARE IRREGULAR

LONDON, Oct. 20-The stock market was irregular today. Oils, mines and rails were dull. Speculative enthusiasm toward industrials has been reduced because of fears of a rise in the Bank of England rate sometime between now and the middle of November.

Rubber shares were quiet. Royal Dutch was 29 %. Rlo Tinto 41%, and Courtaulds 5 3-32c.

some were quiet. Roy.

some was 29%, Rio Tinto 41%, and Courtaulds 5 3-32c.

AMERICAN MACHINE BOOKINGS Bookings of American Machine & Foundry Company and subsidiaries for the period of Jan. 1, 1928, to Oct. 2 totaled \$4,569,000, compared with \$3,825,000 for the like period of 1925. Bills for the period totaled approximately \$4,281,000, compared with \$2,900,000. SOUTHWESTERN POWER & LIGHT (Earnings of subsidiaries) SOUTHWESTERN POWER & LIGHT Southwestern Power & Light for August reports net after taxes but before interest and depreciation of \$618.256, compared with \$538.309 in August, 1925, and for seven months \$7,250,489, compared with \$6,749,386.

KEROSENE PRICE CUT

#### SEEK BETTER PRICE FOR COTTONSEED

AGAIN DECLINE Growers and Brokers Unite in Market Study

MEMPHIS, Tenn., Oct. 20 (Spe-Crop—South Is Selling

The growing opinion that more cotton has been made since Oct. 1, and that the Government estimate of Monday next will indicate a prospect exceeding 17,000,000 bales, has the growers again scurrying to market with their crops.

MEMPHIS, Tenn., Oct. 20 (Special)—Cottonseed crushers of the South, and refiners, brokers, and dealers in cottonseed products from all over the Nation, who met here following a call of the Alabama Cottonseed Crushers' Association failed to indorse outright the Alabama plan calling for each oil mill in the South to buy and hold 2000 tons of seed, or 1,200,000 tons aggregate, thus holding cottonseed products from all over the Nation, who met here following a call of the Alabama Cottonseed Crushers' Association failed to indorse outright the Alabama plan calling for each oil mill in the South to buy and hold 2000 tons of seed, or 1,200,000 tons aggregate, thus holding cottonseed products from all over the Nation, who met here following a call of the Alabama Cottonseed Crushers' Association failed to indorse outright the Alabama plan calling for each oil mill in the South to buy and hold 2000 tons of seed, or 1,200,000 tons aggregate. gate, thus holding cottonsee ucts having current valuation of \$46.-

000,000 off the market. The delegates, however, approved to stabilize cottonseed products. They adopted resolutions deploring the "selling panic" and calling for an attitude of more confidence and

The vital object to be obtained orderly marketing of the products, they said. To gain this end, the conference said seed cotton was worth \$5 a ton more than the current price and advised farmers to store what they can and market it gradually, shortening made from cottonseed oil. The oil mills were asked to stop selling "short" and to reduce their cut of linters to 60 pounds per ton of seed. "Good morning!" the rose bush

### CREDIT FRAUDS BEING CHECKED

National Association's Campaign Said to Have Saved Business Men \$10,000,000

Special from Monitor Bureau

JIMMY TORTOISE put out his head from under his shell, blinked his eyes, then slowly but surely crawled out of his cozy corner into the sunshine.

"I think I will take a stroll around the corner. Good night, friend, and thank you for all the sweetness you have sent the carden." He collicated as he can be supposed. CHICAGO, Oct. 20-Ten millions was reported here by J. H. Tregoe, executive secretary, in an address before a business men's meeting at the Union League Club here.

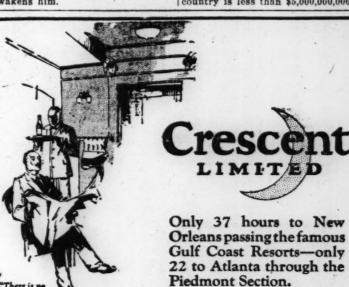

"Yes, quite soon," he murmured.
"Thank you for the sweet petals you threw down to me," he whispered Of a \$2,000,000 fund, set as and objective to finance operations for five years, it was stated that already \$1,500,000 has been subscribed in cash. The association has 50 investigators working from three centers New York, Chicago and San Francisco-to discover and publish credit frauds. Since the campaign began in June, 1925, 131 persons convicted of credit frauds have been sent to jail, 560 cases are pending, 381 indict-ments have been returned, and there have been 15 lost trials. Cases closed for lack of evidence totaled 322.

corner and the box tree, went right through the bed of evening scented stock, in which he had spent many It was reported that 54 convictions were obtained in New York City, 23 additional in the East, 33 in the night during the summer, called on central zone, and the remainder in the West. More than 1000, cases trees, paused a moment or two by the have been handled. Industries and trawberry bed, rested awhile among businesses involved include a great the primroses, and eventually came back to his corner by the potato variety, it was pointed out, to show that credit frauds exist and cause patch. All along the way he was thanking his garden friends for their substantial losses in varied businesses.

Mr. Tregoe explained why he believed investment of business men in this campaign will bring them re-wards "five fold" in elimination of "Deary me!" he exclaimed as he wards "five fold" in elimination of wibble-wobbled toward his bed. "I credit frauds. He declared that am gled to have seen them all once "credit is the great ally of modern more. What a happy summer it has business," and expressed a belief been to be sure! Ugh! My word I that this country prospered after think the winter is not far away. the situation in 1921 because the How grateful I am for this cosy United States has a strongly de-

veloped credit system.

He said that in the last 25 years self into his bed, drew in his head United States credit clearances, as and legs until nothing could be seen measured in bank checks, have but the top of his shell, and was soon grown from \$84,000,000,000 to \$500,fast asleep. And there we will leave 000,000,000 annually and that the him until the warm spring sunshine actual money in circulation in this country is less than \$5,000,000,000.

#### **OLYMPIC GAMES** MEETING SOON

#### Machinery for United States Participation to Be Set Up at Washington

NEW YORK, Oct. 20 (A)-The machinery for the United States' participation in the ninth Olympic Games at Amsterdam, Holland, in 1928, will

be set up in Washington, Nov. 17 and 18 at the quadrennial meeting of the American Olympic Association.

This permanent organization, according to announcement last night by the secretary, Fred W. Rubien, will appoint an Olympic committee to take active charge of plans for the American representation at the games According to the American representation at the games and the properties at the games and the games and the games at the games and the games at the games a ican representation at the games. Action also probably will be taken in the selection of coaches for the athletic

The meeting in Washington will follow the national convention of the Amateur Athletic Union at Baltimore from Nov. 14 to 16.

The call for the meeting in New York yesterday was sent to the 76 sports governing bodies affiliated with the American Olympic Association as the first step in the campaign. An effort will be made to provide more complete and permanent organization for America's activities in the Clympic Games. This was revealed when the A. O. A. made public the proposed amendments to its constitution which will come up at the November meeting

in Washington.

One of the proposed amendments provides that the American Olympic Committee, appointed two years prior to the Olympic Games and functioning to the Olympic Games and functioning until the November following the games, employ a full-time paid secretary who can and will give his undivided attention to the duties of the office. This amendment is proposed by the Intercollegiate Association of Amateur Athletes of America through G. T. Kirby, its advisory board chairman, and is recommended for rejection by the A. O. A. legislation committee, composed of Col. A. G. Mills, chairman; Henry Breckenridge, Maj. F. H. Briggs, M. A. Reckford and W. D. Puleston.

Amendments Proposed

Another proposed amendment is made that the money subscribed or solicited for the United States' participation in the Olympic Games would be accumulated and disbursed by the American Olympic Committee for the purpose of financing the country's participation in the same and several proposed in the same accumulated and disbursed by the purpose of financing the country's participation in the same and several proposed in the same accumulated and disbursed by the purpose of financing the country's participation in the same accumulated and disbursed by the purpose of financing the country's participation in the same accumulated and disbursed by the purpose of financing the country's participation in the same accumulated and disbursed by the purpose of financing the country's participation in the same accumulated and disbursed by the purpose of financing the country's participation in the same accumulated and disbursed by the purpose of financing the country's participation in the same accumulated and disbursed by the purpose of financing the country's participation in the same accumulated and disbursed by the purpose of financing the country's participation in the same accumulated and disbursed by the purpose of financing the country's participation in the same accumulated and disbursed by the purpose of financing the country's participation in the same accumulated and disbursed by the purpose of financing the country's participation in the same accumulated and disbursed by the purpose of financing the country's participation in the same accumulated and disbursed by the purpose of financing the country's participation in the same accumulated and disbursed by the purpose of financing the country's participation in the same accumulated and disbursed by the purpose of fina pation in the Olympic Games would be accumulated and disbursed by the American Olympic Committee for the purpose of financing the country's participation in the games exclusively, and any balance remaining would be intrusted to the American Olympic Association for for retention by the association for for retention by the association for for retention by the association for the use of the American Olympic Committee for the succeeding Olympic Games. A permanent office for the American Olympic Committee is proposed, and under another proposed amendment it is proposed that Olympic Committee for the succeeding Olympic Games. A permanent office for the American Olympic Committee is proposed, and under another proposed amendment it is proposed that the American Olympic Association be

is proposed, and under another proposed amendment it is proposed that the American Olympic Association be supported and financed by the dues of its members and by voluntary gifts.

These proposed amendments are the outstanding recommendations in a number of changes proposed by the I. A. A. A. and are submitted, like a majority of the I A. A. A. A. proposed amendments, with the recommendation of the A. O. A. legislation committee that they be rejected.

A proposed amendment submitted by the American Olympic Association and recommended for adoption sets forth the objects of the association as follows:

mittees of the American Olympic Committee, obtaining from the former and furnishing to the latter informa-tion as to all programs, regulations and decisions, preliminary to or during the games, that may be necessary or useful to the American Olympic Com-mittee in discharge of its duties."

#### RICKEY HONORED FOR HIS PART IN VICTORY

ST. LOUIS, Mo., Oct. 20 (P)—C. B. Rickey, vice-president and former manager of the World's Champion St. Louis Baseball Club, was honered with a testimonial dinner Monday night, attended by 350 persons, including United States Senator George H. Wil-liams (R.), and former Governors Herbert S. Hadley and Frederick D.

J. C. Jones, former president of the Cardinals, lauded the work of Rickey in obtaining players and building up the team. He recalled the Cardinal Club was so poor 10 years ago, it could not buy new uniforms for the team at the opening of the season. Samuel Breadon, club president, paid

tribute to Rickey, giving him credit tribute to Rickey, giving him credit for arranging the present Cardinal "minor to major league" system under which the club is enabled to have a supply of fresh baseball material without having to bid against other and more wealthy clubs.

"Branch has been a great big influence in giving the Cardinals a pennant and I'm glad to see that the city recognizes it, even though he has

city recognizes it, even though he has kept in the background," Breadon said.

Rickey, to whom a watch and chain
were presented, paid tribute to
Breadon, Manager Rogers Hornsby
and others for their work. He characterized the team as a gathering of the "highest type, cleanest-cut ball-players, that ever stepped on the

SIGN PRO FOOTBALL CONTRACTS DAYTON, O., Oct. 20 (A)—Professional football contracts were signed by Mayes McLain, star fullback of the Haskell Indian football team, and Jeorge Levi, halfback, here Friday night, it was learned yesterday. The contracts were signed after negotiations by Charles Skelly, Akron promoter. IcLain and Levi will start their prossional careers after they graduate rom Haskell.

#### AGREEMENT MADE BY U. S. ACADEMIES

#### West Point and Navy to Play Next Four Games in East

ANNAPOLIS, Md., Oct. 20—Officials of the United States Naval and Military academies have reached an agreement for the playing of the four annual football games following the game of this year with which the present agreement expires.

present agreement expires.

Under the contract, the games will be played in order on Nov. 26, 24, 30 and 29, and in some city of the Eastern seaboard offering suitable grounds and accommodations and accessibility to the two condenses.

to the two academies.

The military academy has the first selection and has, intimated that it will name New York. Philadelphia and Baltimore, each with a stadium seating upward of 100,000, are also considered,

particularly by Annapolis.

It was agreed that first-year students would not be used on the teams thus removing a serious element of friction between the institutions. While under the contract Chicago or any other Western city could not be selected, a change could be made by agreement as it was this year.

It was also announced that Prince-on University had declined to meet the Midshipmen in football next year, but had offered to play in 1928. The failure to arrange this game is much

Negotiations are on for a game with University of Pennsylvania for next year and are expected to be consum-mated.

MIELDING H. YOST'S University of Michigan charges did not have to re-sort to other than straight football with an assortment of plunges, end runs and forward passes in their 20-to-0 victory over Minnesota, consequently the scouts were somewhat disappointed.

Michigan completed four of 12 passes for 181 yards, while Minnesota completed one out of 12 for a 15-yard gain. The Gophers intercepted two to one for the Wolverines. At that the wisners had only nine first downs to 10 for the losers. Minnesota lost 65 yards on penalties.

Princeton football players are received Plan Permanent Organization

"Its objects shall be to create and maintain a permanent organization representative of amateur sports and of organizations devoted thereto in the United States for the purpose of as-

Two triple-threat players contribute to the great power and versatility of Michigan's attack. Much has been said Michigan's attack. Much has been said of the prowess at passing, running and kicking of Benjamin Friedman '27, the quarterback and captain, but L. M. Gilbert '28, halfback, is not so well known outside of his own camp. In the game with Minnesota Gilbert did everything that Friedman did with equal skill, and ran the ends a little better than Friedman could. The value of both players is increased by the fact that they can receive forward passes as good or better than Michigan's famous ends.

or better than Michigan's famous ends.

New rules were a factor, though not critical, in the Michigan victory over Minnesota last week. Michigan was penalized five yards once for two successive incompleted forward passes, while Minnesota got two consecutive five-yard penalities for incomplete passes when it threw four in a row, all incomplete. The first one did not draw a penalty and the fourth one lost the hall on downs, so there was no penalty to be inflicted on it. The other new rule invoked was that regarding st losse ball going over the sideline being awarded to the side last touching it on the field of play. Minnesota blocked a punt and Michigan recovered it out of bounds, but Minnesota was given the ball, having touched it in the field of play by blocking it.

PITTSBURGH GETS OUTFIELDER PITTSBURGH, Pa., Oct. 20 (P)—L. Posoi, pitcher and outfielder of the Springfield Western League Club, will join the Pittsburgh National League Baseball Club next year. Posoi was sold to Columbia, S. C., in the South Atlantic League, at the close of this season and Columbia turned him over to Pittsburgh.

#### PRINCETON CALLS OUT Kansas State Is MEN IN TWO SPORTS

#### Prospects Look Bright For a Fine Hockey Season

PRINCETON, N. J., Oct. 20-Prince on University sport followers see prospects of a fine hockey season this year, due to the initial turnout of 60 candidates for the team here yestercandidates for the team here yesterday, among them eight lettermen,
and in answer to Coach Frank Sullivan's first call for swimming candidates, 70 made their appearance.

Although the hockey rink will not
be available for use until after Dec. 1,
the candidates will be put through a
course of technical drills. Coach
Beattie Ramsay, who was captain of
the 1924 championship Canadian
Olympic hockey team, will not be with
the players until the ice is ready. Olympic hockey team, will not be with
the players until the ice is ready.
Something new in the way of training will go into effect for the swimmers
this year. During the first month or
so, Clarence Foster, wrestling coach
and mentor of the crews during the
winter training, will take charge of
them. The swimmers have a hard
schedule ahead of them this year.
They will meet Dartmouth College,
Syracuse University, the United States Syracuse University, the United States Naval Academy, in addition to two encounters with Yale University and other intercollegiate league members.

#### Central Pro Hockey Teams Recruiting

MINNEAPOLIS, Oct. 20 (Special)-The Minneapolis Hockey Club is League, and announced yesterday the signing of nine Eveleth players, fol-lowing the decision of Eveleth-Hib-bing, the former Arrowhead aggrega-tion, not to carry its team into the new American Professional Hockey

The Minneapolis club accordingly stepped in with the purchase of the nine men through Lloyd C. Turner. coach and manager of the Miller sextet. One Eveleth player, Victor Des Jardien, has become the property of the St. Paul Hockey Club, which also is realigning its forces for the coming campaign, the dates of which will be fixed at a meeting of the league in the near future.

The players acquired by the Minne-apolis club are Patrick Clarke and

apolis club are Patrick Clarke and Loren Armstrong, defense: Patrick Byrne, Ade Johnson, Frank Peters and Eugene Chouinard, forwards. Of this number the majority will be traded or sold, according to Coach Turner, with Vadis Lindsay, Edward Rodden, Clark and William Hill likely to be the only former Rangers retained in the new scheme of things.

Negotiations also are under way by all the western clubs toward the securing of new talent from Canada. St. Paul has retained Joseph J. Miller of Toronto for goal and expects to have Joseph W. McCormick, former St. Paul player, back in the following, since the league has become professional, and McCormick, formerly with Edmonton, again is eligible for competition. Practice is scheduled to start Nov. 1 with the schedule opening early in December.

## Out to Win Again

#### Harriers Win First Meet and Are Now Pointing to Conference Honors

MANHATTAN, Kan. (Special Correspondence)—Harriers of Kansas State Agricultural College, champions of the past two Missouri Valley Conference cross-country seasons, are running over the practice course here in preparation for the remaining meets on their schedule, following a victory over University of Kansas here recently, 22

The Kansas Aggle hill and dale team The Kansas Aggle hill and dale team is confidently expected to repeat its victories of the past two seasons. Of the six men five are veterans. Former Capt. R. E. Kimport '27 is eligible for one more year of cross-country competition. Capt. M. L. Sallee '27, P. A. Axtell '27, L. E. Moody '29, and A. E. McGrath '28, all "K" wearers from last season's championship team, are out for the team. Four of these men are veterans of

two cross-country seasons, while Mc-Grath has had only one year's experience. Who the sixth man will be depends upon the results of the next two weeks' practices, but G. T. Bono '27, seems to have the advantage on '27, seems to have the advantage on J. L. Hanlin '29, and Temple Winburn '29, the other contenders. H. A. Brockway '28, is another candidate for the vacant cross-country post. Bond's claim to the place is based not only on his performance of this year in the tryouts; but also on his record in intramural cross-country last spring which he won easily.

which he won easily.

If the sixth man, whoever is chosen strengthening its ranks, depleted by for that place, can get in the same the raids of the National Hockey condition now shown by the five veterans, the Purple wearers undoubtedly will make their third straight crosscountry pennant as all of the letter men have kept in fair running condi-tion throughout the summer.

The Aggies will continue to follow their Conference practice of staging the cross-country meets at the same time and place as prominent football games, starting the run during the first quarter of the game so that the runners can finish the race during the period between halves.

#### SIXTEEN PLAYERS REPORT AS RANGERS

TORONTO, Ont., Oct. 20 (P)-The New York Rangers, one of the three new United States teams in the en-larged National Hockey League, started training here yesterday with 16 signed players in uniform under the instruction of Coach Connie Smythe coach of the University of Tor

tet, international intercollegiate champions last year. The players to report were Goalkeeper Cox, formerly of Iroquois Falls, Ont.; Fred and William Cook, stars of last year's Saskatoon team; Frank Boucher, Michael MacKay and Frank Waite of last season's Vancouver Maroons: I. W. Johnson and William Boyd of Minneapolis; Murray Mur-dock of Winnipeg; Paul Thompson of the Calgary Canadiens: Vail of the North Bay Trappers, Ontario: Patrick Callighen of Owen Sound; Maracle, an Indian from the Toronto Industrial League; Desmaris, formerly of the Sudbury Juniors, Ontario, and Couture

White of Fort William. Ont., and Clarence J. Abel of Minneapolis, are expected to arrive in a few days.

SKIFF RELEASED OUTRIGHT NEW YORK, Oct. 20—William Skiff, catcher, who was recalled from Toronto by the New York American Baseball Club in late September, with the possibility of his being needed in the World Series with B. O. Bengough out, was yesterday released outright to the Newark Club of the International League.

#### Another Re-Sail in Fishermen's Series

Breeze Freshened to 10 Knots Soon After the Start of the Fourth Race

NEW YORK, Oct. 20—When the officers and delegates of the Amateur Athletic Union of the United States convene for their annual convention on Nov. 14. 15 and 16 at Baltimore, Md., they will be asked to act upon a number of changes in competitive gymnastic rules. This became known at a meeting of a number of the country's leading gymnasts held at the A. A. U. headquarters yesterday. Plans were adopted for the improvement of competitive gymnastic conditions and for the purpose of making the rules and regulations of the sport in America harmonize more closely with the rules for Olympic competition. The rules of the meeting are: That one prescribed and one voluntary exercise will be required in each of the five apparatus events in the allayound, the prescribed exercise to be published six weeks in advance of the five apparatus events in the allayound, the prescribed and two voluntary exercises be required in the long horse; that a brisk swing be required in the swinging movement on the flying rings.

That the scoring for the team championship shall be on the basis of seven

of the long horse; that a brisk swing be required in the swinging movement on the flying rings.

That the scoring for the team championship shall be on the basis of seven points for first place, five for second, four for third, three for fourth, two for fifth and one for sixth place, and that an organization be required to have a team entered in the meet to be eligible to compete for the team championship, thereby eliminating the possibility of one man scoring a sufficient number of points single handed to win the team title.

That the scoring for the team championship, thereby eliminating the possibility of one man scoring a sufficient number of points single handed to win the team title.

That the scoring for the team championship shall be different to the points of the side horse shall be 3ft. 6in. Without raised neck; that the maximum height of the long horse shall be 4ft.; that the basis of marking performances shall be as follows: Difficulty and combination, 50 points; execution, 40 points; approach and retreat, 10 points.

The meeting also had the benefit of proposals by letter from the following: Paul Krempel, Los Angeles; Adolph Picker, Baltimore, and from the chairmen of the gymnastic committees of the Allegheny, Niagara. Intermountain, Southern Pacific, South Athraic and Florida Associations of the Amateur Athletic Union.

VERMONT ANNOUNCES

half of the distance to the first mark half of the distance to the first mark had been covered, Captain Crouse was caught napping and the Bluenose shot up to weather of the Haligonian, blanketed it, and drew ahead. They jibbed for the run to the mark with the Haligonian again going to weather and in a second jibe around the buoy, with Captain Crouse calling for sea room, the Haligonian's bob-stay came aboard Bluenose's after-quarter, ripping away a portion of the rail and two stanchions.

On the run to the second mark, Bluenose gained 30s. and on the close reach to the third mark, Im. 45s. On the 12-mile thresh to windward to the finish line, Bluenose again proved its superiority on the wind by increasing its lead by 26m. 27s.

WEBSTER RETURNS AT YALE NEW HAVEN, Conn. Oct. 20—W. A. Webster '28S, veteran gurad, lost to the Yale eleven for nearly four weeks, has returned to action. He has been shifted to right tackle. J. D. Charlesworth '20, who played in Webster's place at guard, was left in that position.

#### "GOLDEN RULE" DINNER HELD

International Near East Relief Work Described by Noted Speakers

GENEVA (Special Correspond ence)-Five hundred guests, including many notables, attended the "Golden Rule Dinner" of the Interthe shores of Lake Geneva, following the meeting of the executive committee here recently accommittee here. national Near East Relief Associa-

general of the League of Nations, presided, and among the speakers were the Metropolitan of Sofia, Archbishop Stephan, Commadore Melas of Athens, Archbishop Soder-blom of Upsala, Sweden; Dr. Adolf Keller, secretary of the League of Protestant Churches in Europe; Miss Edith Glanville, member of the judiciary, New South Wales, and Sir Willoughby Dickinson, head of the organization which is working for peace through the churches. Be these Charles V. Vickery, president and Gordon L. Berry, general secretary of the International Near East Relief Association, spoke. Representatives from France, Switzerland, and other countries were present.

All the speakers emphasized the necessity of applying the Golden Rule in every phase of life. Mr. Vickery pointed out that as a result of observing an annual "Golden Rule Sunday," a plan inaugurated at Geneva two years ago, not less than \$2,000,000 had been raised for the fugees and orphans of the Near East, that a large number of people in 50 countries had had their atten tion called to the fundamentals of Golden Rule, that the rich had been brought closer to the poor, that people of many different regions had been attracted into a common brotherhood of service, and that to a certain extent the nations had be-

The Golden Rule Sunday, Mr Vickery said, makes people conscious of the unity of their needs, aspira-

The dinner itself was an exempli fication of this statement. There were present Protestants, Jews, Roman Catholics, and members of the Greek Orthodox Church, Indians, Africans, Chinese, Japanese, Europeans and Americans all advocates of the Golden Rule in life and prac-

Mr. Vickery related how Japanese girls were supporting a number of Armenian orphans and said that the Japanese House of Lords had sent him a substantial check. Dr. Nitobe referred to the Golden Rule as nental element in the spiritua life of his people, and Miss Glanville described how in far distant Australia the people had contributed lib-erally for the support of Near East orphans. At a later meeting delegates from the Hawaiian Islands told how generously the people there had con-tributed to the Near East Relief.

It is expected that this dinner will more than \$15,000 to the Near East ne followed by a large number of Relief. similar celebrations in many countries throughout the world in con-nection with "Golden Rule Sunday"

## **EDITORIALS**

The seventh session of the Assembly of the League of Nations will be famous in history as

The Seventh Session of the League

the session in which Germany took her place among the great powers as one of the permanent members of the Council. It marked the beginning of a new era in European history which closed the post-war period in which

Germany was still excluded from the comity of nations and regarded with suspicion and dislike as a nation which must be kept under control. The policy pursued by Sir Austen Chamberlain and Aristide Briand at Locarno, when they opened the door to the return of Germany to the concert of Europe triumphed on the day when the Assembly, by unanimous vote, admitted Germany to the League and approved her appointment to a permanent seat on the Council.

Those who heard the speech in which M. Briand celebrated the return of Germany to the European fold will long remember how, with dramatic gesture, he banished the specter of war from the world and spoke of the dawn of the new age of international brotherhood. A few days later the Locarno treaties received their final ratification in Geneva, and then came the meeting between M. Briand and Herr Stresemann at the wayside inn at Thoiry, when these two statesmen laid the groundwork for the friendly collaboration of their two countries by discussing the means by which outstanding differences between France and Germany could be removed.

Although some mystery still surrounds the details of their plan, its salient features are established. In return for the evacuation of German soil and the withdrawal of the Military Control Commission, Dr. Stresemann offered to accelerate reparation payments by the flotation of the German railway bonds and to repurchase the Saar coal mines. To Belgium he was prepared at the same time to give a substantial sum for the cession of Eupen and Malmedy, a small district which was given to Belgium by the Treaty of Versailles after a plebiscite which is generally admitted to have been no fair test of the opinion of its inhabitants, who are mainly German. Germany and France were also to conclude commercial treaties and agreements.

It is obvious that if such a plan for the liquidation of the occupation is to go through, the assistance of the United States will be necessary. For in no other money market than that, of New York could sufficient money be found to float the German railway bonds, even if the purchase of the Saar mines or Eupen and Malmedy could be accomplished without upsetting the German exchanges, which it is the primary duty of Gilbert Parker, the American chairman of the Dawes committee. to safeguard. He is understood to be opposed to the issue of the bonds at present, on the ground that this would endanger the transfer of reparations. The Briand-Stresemann scheme for the settlement of Franco-Gérman differences is not likely, therefore, to advance further for the moment.

M. Briand paid a tribute to the value of the League as an instrument for the pacification of Europe when he claimed that without the League the Locarno treaties would never have come into force, and consequently that his conversations with Dr. Stresemann would not have taken place. The celebrated "Geneva atmosphere" has no doubt contributed in no small degree to render possible an exchange of views on subjects which stand in the way of the reconciliation of France and Germany. It is not so much the speeches which M. Briand and Dr. Stresemann made to the Assembly that are important as the fact that they were able to make them, and to follow them up with the conversations at the wayside inn. There are still difficulties and obstacles to overcome before it can be said that all danger of war has been removed. A settlement must be reached in the disarmament question, for instance, for that is the key to the arch on which the structure of the new European society must rest, if it is to have stability. But if the good will in which the Seventh Assembly of the League worked continues to leaven the consciousness of Europe, the world may hope for results which a few years ago seemed to be purely visionary.

With becoming modesty, and yet not without some feeling of pride, the Investors' Protective

Censoring Investment Advertising

Bureau of Chicago calls attention to the fact that in the last seven years it has advised and effected the rejection by newspapers in that city of advertising designed to exploit questionable

investment securities, so called, exploiting schemes capitalized, nominally or otherwise, at more than \$300,000,000. This constitutes public service of a high order. The regrettable thing about it all, however, is that despite this voluntary espionage almost numberless wildcat ventures fully as visionary and just as fraudulent in their inception have been foisted upon the public and advertised in glowing phrases by newspapers, magazines, financial journals and circulars and cleverly worded prospectuses.

In Chicago, it appears, special attention has been given to an effort to suppress concerns suspected of operating bucket shops. Whereas more than fifty of these "offices" existed when the campaign against them was started, but few, if any, are now being operated. But it is in the censorship of newspaper advertising and publicity that the bureau is chiefly interested at the moment. Co-operating newspaper publishers have shown a commendable willingness to submit to the bureau all questionable or doubtful advertising copy offered by promoters. Similarly the officers of the bureau have rendered valuable voluntary service as advisors to the officials of the Securities Department at the Illinois State Capitol in Springfield. As a result licenses have been refused promoters and their salesmen in cases where the securities offered

for sale failed to meet the test applied. Those who sometimes complain of pater-nalistic tendencies which they insist are dis-

played by federal and state governments are seldom heard to protest against this particular activity. The public seems disposed to take it for granted that officers of the law, the legislatures, Congress, and the courts, will find a way to protect careless and sometimes grasping investors against the results of their own folly. Human nature has a way of always looking for what it calls "the best of it." Greed outweighs judgment in many cases, and the haste to get rich suddenly and by some easy process silences caution.

Newspapers, no matter how closely they may investigate the advertising offered them, and no matter how close the espionage and censorship carried on by such bureaus as that maintained in Chicago, will never be able to insure absolute protection against cleverly planned frauds by cunning and designing promoters. The final decision in every case rests with the person who is tempted to part with his money in reliance upon another's promise to pay. The ordinary individual, even though untrained in business, would hardly lend money to a stranger upon an unsecured promissory note. And yet the same plausible stranger, if he comes armed with impressive official-looking certificates or bonds, can usually argue himself into a warm welcome.

There is no denying the fact that the careful and impartial censorship of advertising offered to the newspapers by those planning a campaign of extortion against the public should be extended until every avenue of publicity through the agency of the public prints is closed. But in the meantime there is an equally insistent need that those upon whom the burden finally falls awaken to a realization of their individual responsibility to protect themselves.

"Who is the enemy?" asks a character, in Channing Pollock's stirring play, of the small

Hate, the Enemy of Mankind

boy, who, violently beating his drum, deplores the fact that he has no sword wherewith to kill the enemy.

"Everybody but us," is the sweeping response. It is not in war time alone, nor only as be-

tween nations, that this curious and indefensible sense of enmity finds place in the thoughts of men. In war time, of course, it is exaggerated in its proportions, being enormously increased and embittered by the systematic propaganda which teaches the nationals of one land to regard as monsters those of all countries not in alliance with them. And yet the sane definition of the enemy is the one which Mr. Pollock has set forth in his play, and emphasizes with many vigorous dramatic strokes. The true enemy is hate. It was as much the enemy of the British as of the Germans in the recent war. It was the enemy of all mankind, and the results of its enmity were not terminated with the Versailles Conference, but will continue to rack and torture the world until men learn to take seriously the injunction of the Master, "Love your enemies, bless them that curse you, do good to them that hate you, and pray for them which despitefully use you, and persecute you.'

Mr. Pollock has done a distinct service to humanity by writing and producing this play, which after a long season in New York is now having its Boston run. Perhaps no form of literary expression carries as much weight, and so enforces conviction as does the dramatic form. The picture this dramatist has drawn of the disaster and ruin brought upon 'a peace-loving home by the sudden impact of war is only the more obvious part of his lesson. What really counts is the skill with which he has been able to point out that just as those following the banner of the Allies thought that all righteousness, all grandeur of sacrifice were on their side, so too, the Austrians and the Germans lulled their own consciences with the conviction that they were the innocent victims of foreign aggression. He has shown how suddenly and seemingly irreparably the most intimate and affectionate human relations can suddenly be turned into hatred by war-time frenzy. He has depicted in no uncertain colors the destruction of individual liberty of thought and speech that inevitably follows war, and he has not failed to bring in impressively the figure of that sinister factor in war-time hysteria, the

"The Enemy" is perhaps a play which follows too closely upon the agonies and the hatreds of the World War for its appeal to be as general as it should be. Nevertheless, the time is here and now that the lesson it teaches should be learned. And it is to be hoped that it will have that wide presentation and general attendance which will enable it to exert the influence over the thoughts of men that its subject demands.

Forty years ago, Thomas G. Shearman, an eminent attorney representing great corporate

The Distribution of Property interests, started a nationwide controversy by a magazine article in which he undertook to show that by far the greater part of the wealth of the United States was owned by a very small number of the

population. The figures, taken from official records and other reliable sources, were so startling that they were immediately questioned as unfair and misleading, but further researches by Mr. Shearman and Charles B. Spahr of Columbia University showed that, if anything, the original article had erred on the side of understating the extent to which property was in the hands of an insignificant percentage of the people. Looking out over the hosts assembled at the National Democratic convention in Chicago in 1896 to adopt a radical platform and nominate a candidate of whom the great property-owning interests would stand in awe, an Iowa delegate commented: "This was started by that Shearman article in the Forum."

Conditions have changed greatly since that time, and the production of wealth has increased so enormously that it is not surprising that the United States Treasury Department should state that there are more than 11,000 Americans who are owners of property valued at over \$1,000,000. This fact would seem to indicate that the belief of a generation ago that the wealth of the nation would inevitably gravitate into the hands of an

ever-decreasing number of persons owning great fortunes was unfounded. Instead of the number of millionaires decreasing while the already rich became richer, there have been many more whose possessions have gone beyond the million

Again the question arises as to the ownership of the United States. An article in the American Bankers' Association Journal points out that a survey based on estates of decedents shows that 91 per cent of 184,000 estates examined had an average value of less than \$3600, while more than 76 per cent of the estates had an average value of only \$258. In this connection it must be remembered that a large percentage of the population leaves no estate whatsoever. That the American people as a whole are richer than those of any other country is undeniable. The facts given by the journal, however, suggest that equitable distribution of the country's wealth has not kept pace with the greatly increased productive power of industry.

Canadian statesmen wisely refrain from spending much time discussing the question of

Canada's

Relations

With the

United States

annexation to the United States. There is no sentiment in Canada worthy of serious attention in favor of annexation It would be just about as profitable to discuss somebody's proposal to annex Alaska to Canada.

Recent talk about annexation, particularly apprehension which has been expressed in England, is largely due to electioneering propaganda in the Dominion. Some Conservative opponents of the Liberal Party are prone to criticize the Liberal policy as tending toward the union of Canada with the United States. They know that there is no public opinion in Canada favorable to annexation. It would be very unpopular: hence it is regarded as a handy election weapon to direct against political opponents.

It has the effect, however, of misleading people in other countries, particularly in Great Britain, when they read articles from political party sources which are directed against the Liberals. It is especially disturbing to stalwarts of the Empire when they see the arguments about annexation tendencies supported by statistics with regard to the growth of economic unity on the North American continent. Perhaps they forget that there is growing economic unity also between Great Britain and the United States, as there is between France and Germany; but nobody has any apprehension that such economic unity is leading to political union in the shape of annexation.

Premier Mackenzie King expressed the Canadian point of view recently. In answer to an interviewer, he denied that any member of the Liberal Party favored annexation, or that any political movement toward annexation existed in Canada. Mr. King went on to speak of the splendid example which the neighboring countries in North America are setting to the world. They have an unarmed frontier of practically 4000 miles. For more than a century they have been free from frontier armaments-for along the border line between Canada and the United States there is not one fortress, nor even a gun in position. The North American people have substituted, for competitive arming, a system of conciliation and arbitration as a means of settling international differences as they arise. "We are giving, in this way," said the Prime the finest object lesson that the world has had of the greater wisdom, of the appeal to reason as against the appeal to force in the settlement of world problems.'

Canada and the United States are rendering an enduring service to civilization. It is Canada's inestimable privilege, too, to occupy the position of an interpreter between British and American public opinion, to promote understanding and, as Mackenzie King has said, "to avoid ill will and foster good will in a manner and under conditions which promise more for peace in the world than through association in any other way." This is an opportunity which the Canadian people will not lightly forgo.

#### Random Ramblings

"We regret to see how obstinately American women are bent on appropriating more than their fair share of constitutional privileges." How much more generous is the conception of a "fair share" today than when the above statement appeared in the New York Times in 1851!

Read recently in the press: Arboretum Walks Saturday and Sunday. Library Talks Every Thursday. Now why not have "Restaurant Eats" on the other

> Four gills make one pint. Two pints make one quart. One quart makes a peck of trouble.

Even those who are willing to forgo "staunchly" and stand by Mr. Webster "stanchly" are apt to "wobble" a bit when he asks them to spell it "wabble."

American and British philatelists, meeting in New York, have agreed not to revive the former argu ment about the Stamp Act.

The women say they will go back to long hair when the men begin once more to wear Burn and Dundrearys.

No wonder the speeches of the Governor of New York fail to set the country on fire; they are too damp. Nothing is wholly useless; do not forget that even a stopped clock is bound to be right twice each day.

Suppose the cost of living is much higher now than it was twenty-five years ago. Isn't it worth it?

If we could see ourselves as others see us, it is hardly likely that we would believe it.

Many American cities are famous for their parks; also their lack of parking space.

Those who know what's what are often found listed

A large rent makes a big hole in one's income.

#### One Who Stood By

TT IS reached by a long, steep mountain road. On either side of the cart trail are thick woods of tall, stately pines and spruces, interspersed with maple and beech, and here and there the white trunks of birch saplings, like rays of silver light brightening up the somber shadows. The only sounds were the liquid notes of the hermit thrush, which, like a string of bells, from first here, then there, from distant spots in the woods, came to me.

The atmosphere of long ago lingered in the song of the pines—pines whose low branches brooded over an old deserted cabin on one side of the road. Farther up, the door of an old, unused schoolhouse creaked lonesomely on its broken hinges as if waiting for the long-ago sound of those little feet in rough cowhide shoes. . . .

A half-hidden brook, frolicking down its rocky bed, made a welling and swelling accompaniment to the voice of the trees and the creak of the old door. Then, beyond it, I found that little mountain cabin in a clearing of waving grass; and standing on the porch to welcome me was this old friend of all nature lovers; he who alone had remained behind in his mountain home, where three generations of his forefathers had cleared the land and tilled the soil and grazed their herds.

+ + + From his fresh, bronzed face peered out two clear, keen gray eyes—eyes which had taken in something of the grandeur and the deep silence of his mountain, living as he had, for nearly fourscore years, among such surroundings. About the low story-and-a-half timber cabin lay sunny

meadows, golden with buttercups and daisies, with dashes of cornflower and vetch and silky stars of mullein and thistle dipping with the butterflies here and there; until the grass lands met the forest-clad mountains rolling in ever-highering waves to the blue sky far above-a panorama of grandeur and beauty with its ever-changing

pictureful moods.

This sole representative of the third generation on that mountain farm turned to the clump of apple trees at the end of the porch and said with pride: "My mother planted and raised those, and she lived to reap twenty barrels of the fruit.'

As he led me into the long, low-ceilinged room which enswered the purpose of living-room and kitchen, he continued: "Every stone and board and nail in this house was put in by hand by my great-grandfather." And then, in a genial, reminiscent mood, he wandered sketchily back over the years spent in this old mountain home. . .

I lived over again with him those old days when his ancestors cleared the land of timber and herded their flocks all up and down those steep pasture lands, and raised the wheat and oats to feed the hungry mouths in the little cabin and in the adjoining cattle sheds I glimpsed that scene in the old barn as they threshed out the grain with flails, each receiving for his hire every ninth bushel. And I could almost smell the pies and cakes and other goodies which loaded the tables of those sturdy pioneers in those busy harvest days when good cheer and social enjoyment brightened the task in this neighborly interchange of work.

With pride and great tenderness he spoke of that mother who, for many years, presided over that little cabin; spun the flax, carded the wool, wove the cloth to clothe her family and herself; made hundreds of cheeses and great tubs of butter; boiled down the sap from their great

maple forests into sugar for daily use, and cured and packed away hams and bacon and quarter-beefs.

"And then—because she didn't like being idle—she would go out and help the men upon the farm. My mother was a wonderful woman," he continued with a tender light in his eyes that made me think of those soft

floating shadows upon the sunny slopes of his mountain.

"When I took the farm over I never let her do that hard work, of course. And the spinning and the weaving went as the factory came into being. But I well remember going to market with Mother in an ox-cart, with a paid of organ and huttle and a shore or the said of the spinning and the weaving went as the factory came into being. pail of eggs and butter and a cheese or two, and three or four pounds of maple sugar out of the big old barrel to trade in for cloth for the dresses and shirts, and for shoes although these didn't bother us much, for when we children went down to the village for church or school, we saved those precious articles by carrying them in our hands, the stockings tucked inside, till we reached the very door, when we would carefully put them on.

+ + 4 "In mother's girlhood the shoemaker came to the house once a year and fitted them up with shoes—cowhide ones for everyday wear, and calfskin for best. In my time,

however, every village had its tannery and boot shop."

I could see him trudging down the mountain to that now deserted schoolhouse, "with the filling joys of apple pie and cheese" tucked in his tin pail. Those precious three months of the winter season when he was privileged to attend a school.

"I almost cry for joy when I look about my mountain home and think of all the freedom and beauty that have been mine here, away from the scramble for place and the struggle for existence, where I can raise all that I need each year-and some for others, too-and where each season brings its interests and its friends.

"Every spring from that window, for instance, I watch the mother partridge hatch her brood; and then when she is through with it she disappears some morning (always before I can catch her at it) and I find the eggshells tucked one into another the way partridges always do when they leave the nest. I have seen two growths of timber rise and fall on my land-and that in itself has meant a fortune.

"Yes, it is lonely sometimes; but nature lovers in the summer and huntsmen in winter drop in and bring me word from the world outside. And in my quiet life here I have had as interesting experiences, I am sure, and have learned as much of human nature as those who live away from all this peace and freedom. But some day in larger numbers people will leave those crowded cities and come back and resettle these deserted farms lying back among the mountains and along the valleys; and they will learn what it really means to live where the air is ever fresh and there's a glorious picture awaiting your eyes whichever way you turn."

This one who feels that he has chosen the better part;

whose sole recreation in the year is a week at camp meeting; and who has taken in all his life but two or three journeys away from the Granite State; has a genial, keenly interested thought in everything that is going on in the outside world. The seasons come and go with him and add to those scores of friends from far and near who have climbed his mountain, looked into his genial face, and chatted with him of the days which have gone and the days to come, and have gone away wondering if, after all, he has not chosen the better part. E. H. H.

#### The World's Great Capitals: The Week in Berlin

BERLIN

THOSE who know Berlin will be interested to learn that the Government is planning the purchase of the well-known hotel "Der Kaiserhof," located on Wilhelmplatz. The reason for this is the Government's wish to concentrate all its offices around Wilhelmstrasse, the center of the government district, thus being able to simplify its administration. The intended purchase, which still, however, needs the consent of the Reichstag, is generally deplored here, since the hotel is one of the few large hotels of Berlin and at the same time also one of the oldest with many historical associations.

Work on its initial building was commenced in 1873, and when Emperor William I, known for his simple tastes, was shown through the suite reserved for visiting royalties he is said to have turned to Prince Karl accompanying him and to have said half jokingly and half regrettingly: could not live as luxuriously as that, could we!" Kaiserhof Hotel soon became the residence of diplomatists and many princes stayed there. Among its distinguished guests were Disraeli, Count Andrassy and Bismarck. It also became one of the centers of social life, and its socalled Cavalier balls twenty years ago were widely known for their elegance. No wonder that under these circumstances the intended conversion of this hotel into uninteresting government offices is arousing considerable opposi-+ + +

"Peltzer's Victory Over Nurmi. . . . Stresemann in Geneva"; thus the most important photographs contained in the latest issue of a well-known illustrated weekly magazine here were announced. The order, namely, first the sport and in the second place the political event, is typical of the development in this country since the war, where sports, which formerly used to take a back seat have come to the foreground most rapidly in the last lew years. Before the war "turnen," a very rigid form of gymnastics almost reminding one of military drill, took the place of light athletics in the schools, and to be a member of an athletic club was not always regarded as compatible with social standing. Sporting events, moreover, were relegated to the inner pages of the papers where they occupied as inconspicuous a place as possible. Just the opposite is the case now. Running tracks and football grounds are being established all over the place, and the newspapers print reports on important sporting events on their front pages. Leading personalities in the world of sports are known to everyone and are often more popular than politicians. Thus it could happen that Peltzer was given first consideration while Stresemann had to occupy the second place in the weekly's announcements.

+ + + About fifty of Berlin's most popular theater and film stars acted as sales men and women in a leading department store of the West here one afternoon for the benefit of the funds of the Actors' Association. The result was that hundreds of enthusiastic theatergoers crowded the aisles of the store, while thousands thronged the streets clamoring for entrance. Finally the doors had to be closed and a strong police force called to keep order and make way for the traffic. In the meantime the regular shop assistants had to form a chain in front of the actors to shield them from their admirers. Three climbed onto counters to escape too pressing expressions of admiration. Two others fled in an elevator while two fortunate ones succeeded in leaving the store hidden in one of its lorries. How the remaining forty-three escaped is not reported 4 4 4

The Victoria House in the Botanical Gardens is crowded every day toward sunset for it is the blossoming time of the most beautiful of water lilies, the Victoria Regia. Within the space of twenty minutes the closed bud expands, petal by petal, into a waxlike flower the size of a small dinner plate, and the spectators willingly bear the tropical heat to witness the wonder. The Botanical Gardens at Dahlem, on the outskirts of West Berlin, were transferred some twenty years ago from an inadequate site nearer the city. All the plants survived the move and took kindly to their new surroundings. The gardens which cover 168 acres are practically and tastefully laid out, being tended with the utmost solicitude, and the vast glasshouses with their wealth of tropical plants are especially worth a

Otto Froitzheim, once and perhaps even still Germany's best tennis player and well-known before the war on the chief international courts, may possibly become police president at Wiesbaden. For many years Herr Froitzheim and he often arrived at tournaments at the very last minute not having been able to leave his office sooner. He is now going to Wiesbaden to discuss with the allied military authorities the re-establishment of a police force which had been abolished by them.

Letters to the Editor Brief communications are welcomed, but the editor must remain sole judge of their suitability, and he does not undertake to hold himself or this newspaper responsible for the facts or opinions presented. Anony-mous letters are destroyed unread.

"Russia and Socialism"

To the Editor of THE CHRISTIAN SCIENCE MONITOR: I am a constant reader of the Monitor, and I am much impressed with its general fairness, but I was greatly surprised to find the following statement in a recent editorial

entitled "Russia and Socialism": For the essence of the Marxian Socialist philosophy is that the capitalist is per se an exploiter of the workers, and that if private enterprise of every kind were forbidden, and if all production and industry were managed by the state, the economic millennium would arrive.

I have been a reader of Marx for many years, but I have never seen a paragraph or sentence that will in any manner justify these conclusions. Marx teaches that Socialism must come as the next stage in social evolution. Marx teaches that capitalism was a necessary stage in the evolution of production and exchange and that the next stage is social ownership of the industrial equipment. Nowhere does Marx suggest ownership by the state. According to Marx, the state is a class instrument, controlled, ever since the institution of private property, by the owning class, and by that class used to hold the workers in

subjection. And history bears out this contention.

The Russians probably did just what was necessary at the time of the revolution, but they did not establish Socialism—could not do so for the very simple reason that Russia had not reached the industrial stage of economic evolution that made it possible to establish Sociali Lenine, Trotsky and many others of the active revolutionists realized that Sovietism was merely an intermediate stage between semifeudalism and Socialism. It is the function of Sovietism to industrialize Russia, so that it may finally accept Socialism. D. B.

The Monitor and the World's Music

Tacoma, Wash.

To the Editor of THE CHRISTIAN SCIENCE MONITOR: Just a line to tell you how much I enjoy the music columns of the Monros. It is noteworthy, especially, to find the musical events of this city so fully reported in a paper published in Boston, and with such authority, too. Whenever anything important happens concerning the San Francisco Symphony Orchestra, I naturally look in the local papers for a report thereon, but alas! as a rule

they have very little to say.

Thus, when there was a radical change in the personnel of this orchestra last season and I wanted to know (1) the intrinsic value of each new member, and (2) the effect of this change upon the ensemble, there was practically nothing I could find in the local papers to satisfy me and I waited for nearly two weeks until I discovered what I considered to be quite a valuable piece of criticism on the subject in The Christian Science Monitor.

This instance might be multiplied many times.
